Introduction

peculiar position in the educational world. For a good many years it was the popular notion that a public school teacher did not require specific training in how to teach; it was sufficient if he possessed the required academic training in the few branches required by law. And too, those school trustees who often gave him permission to teach their children did not have an elementary school education themselves. As a result, the schools were presided over by a class of teachers who not only did not always know their subjects but the technique of teaching those subjects in an interesting and, at the same time, understandable manner. To overcome this deplorable condition educators insisted that the State should provide efficiently trained teachers for the schools since it was a public problem.

movement of the normal school from its early European beginning to its adoption by the State of Illinois in 1857. We shall also attempt to give the outstanding features of the schools from the time of their establishment in 1857 to 1920. The sources of material are the state laws, reports of the superintendent of public instruction, catalogs and bulletins of their schools concerned, and various contributions on the subject.

Chapter I.

Historical Background

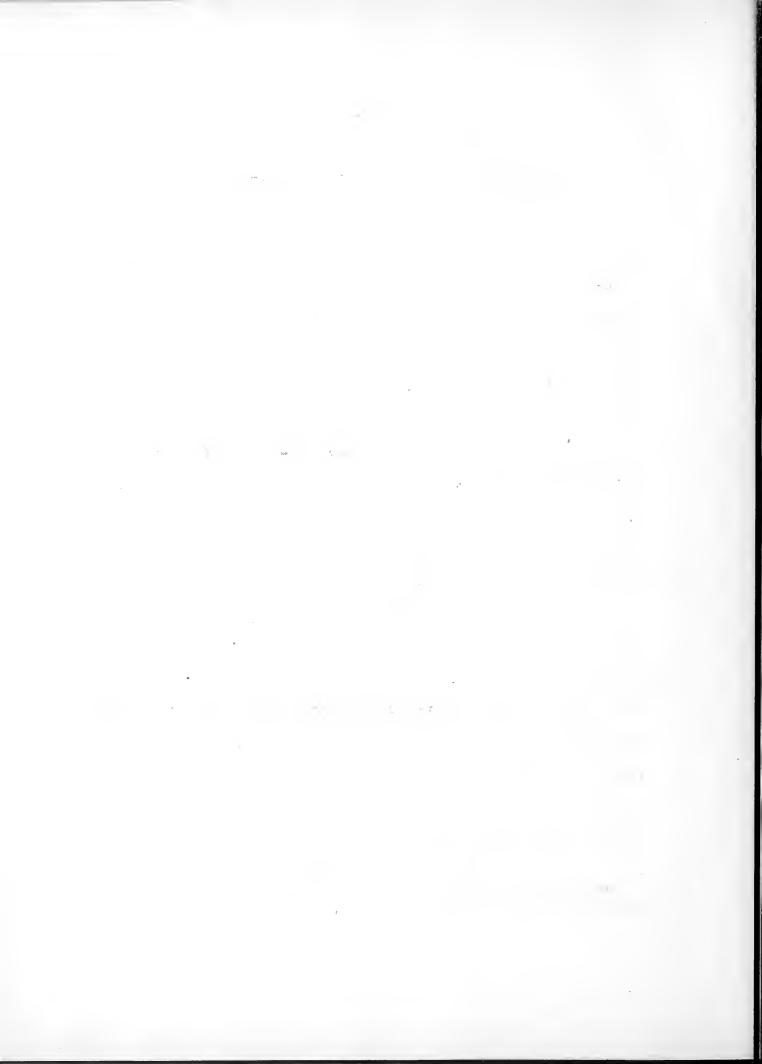

Beginning of the Normal School Idea.

training of young men and women who sim to be teachers, to a thorough and practical knowledge of the duties of the school room, and to the best modes of reaching the heart and intellect, and of developing and building up the whole character of a child. From early times, the fitness of the teacher has been held as one condition of the learner's advancement. Adaptation to the work of instruction is one measure of the best service. And this art of teaching must be illustrated and exemplified by those who are to apply it in a training or model school specially equipped to prepare young men and women for the important business of school teaching.

and training teachers in the principles and practice of their profession, was founded at Rheims in 1681 by the Abbe de la Salle (1). In 1684 this school developed into the now famous Christian Brothers' School (2). From France, the school was introduced into Germany in 1697 by Hermann August Francke who founded a teachers' class, composed of poor students, in connection with his orphan school at Halle, who gave him certain

^{1.} Barhard, Am. Jour. of Educ., Vol.13, p. 753.

^{2.} Boone, Education in the U. S., p. 126.

assistance in return for his board and tuition (1). In 1735, thirty-one years later, the first regular seminary for teachers was established in Fomerania, Prussia, by Hecker, a pupil and follower of Francke, and the second at Berlin, as a private school, in 1748 (2). Normal or training schools were introduced into Hanover in 1757; into Austria in 1756; into Switzerland in 1805; into France in 1808; into Holland in 1816; into Belgium in 1843; and into England in 1842 (3).

The Early Normal School in America

one of the first to suggest the need for more thoroughly trained teachers in the United States was Elisha Ticknor.

This suggestion appeared in the Massachusetts Magazine in 1789 (4). He advocated the establishment of County Schools for the purpose of fitting young gentlemen for college and school keeping. It was advocated that "a board of overseers should annually examine young gentlemen designed for school-masters in reading, writing, arithmetic, and English grammar, and if they are found qualified for the office of school keeping and able to teach these branches with ease and propriety, to recommend them for this purpose(5)."

At the commencement exercises of Yale College in 1816, Denison Olmsted proposed, in his Master's oration, the establishment

by the state of Connecticut, of an academy to train school masters for the State Common schools (1).

at Concord. Vermont, in 1823 by the Reverend Samuel R. Hall, who advertised to give a course of instruction adapted to teachers.

Mr. Fall continued to maintain this school until 1830 when he removed it to Andover, and in 1837 to Elymouth where it remained in existence until 1840 (2).

Influence of the Prussian Wormal Schools

Unquestionably the Prussian Schools had a marked effect on the introduction of normal schools in America. The schools had begun to attract the attention of educators in the United States. We find that in 1829 there was published in New York a book called "Travels in the North of Germany in 1825-6" and written by Henry E. Dwight, which contained an account of the Prussian seminaries for teachers, and urged their establishment in this country (3).

Another man, whose influence was great in the movement for normal schools in America, was Rev. Charles Brooks of Massachusetts. Visiting Turope in 1834, he became acquainted with the Prussian system and especially with the training of teachers. On his return he delivered a carefully prepared

^{1.} Barnard, op. cit., Vol. 13, p. 756.

Boone, op. cit., p. 129.
 Gordy, op. cit., p. 18.

address to his people of Hingham, Mass., setting forth at length and in detail, the needs of the schools in general, and particularly what the Prussian system of State Normal Schools, if adopted, would accomplish in Massachustts. He dwelt on the phrase which he used so often "As is the teacher, so is the school" (1). Mr. Brooks kept up his efforts to bring the matter of normal schools before the public mind. Consequently, in 1836, he resolved to call "a convention of delegates from the geveral towns in the county meet at Plymouth in Court Teek (Wednesday, December 7, at 6 p. m.) to discuss the merits of the greatly improved modes of elementary instruction which have been in most successful operation for several years in Germany, Prussia, and other European states. This step might result in the appointment of a Board of Education (2). The primary purpose of Mr. Brooks was accomplished in april, 1837, when the act establishing the Board of Education was signed by Governor Edward Eyerett (3). When the legislature met in January, 1838, the subject of normal schools was brought up at once. The legislature wished to hear arguments, and Rorace Mann, as secretary, first addressed them. . The second address was by Mr. Brooks on Normal Schools and School Reform (4). At this time a private citizen (Edmund Ewight) anonymously

^{1.} Albree, John, -Charles Brooks and His Work for Normal Schools, p. 26.

^{2.} Ibid., p. 22.

^{3.} Laws of Massachusetts, 1837, p. 277.

^{4.} Albree, John, op. cit., p. 26.

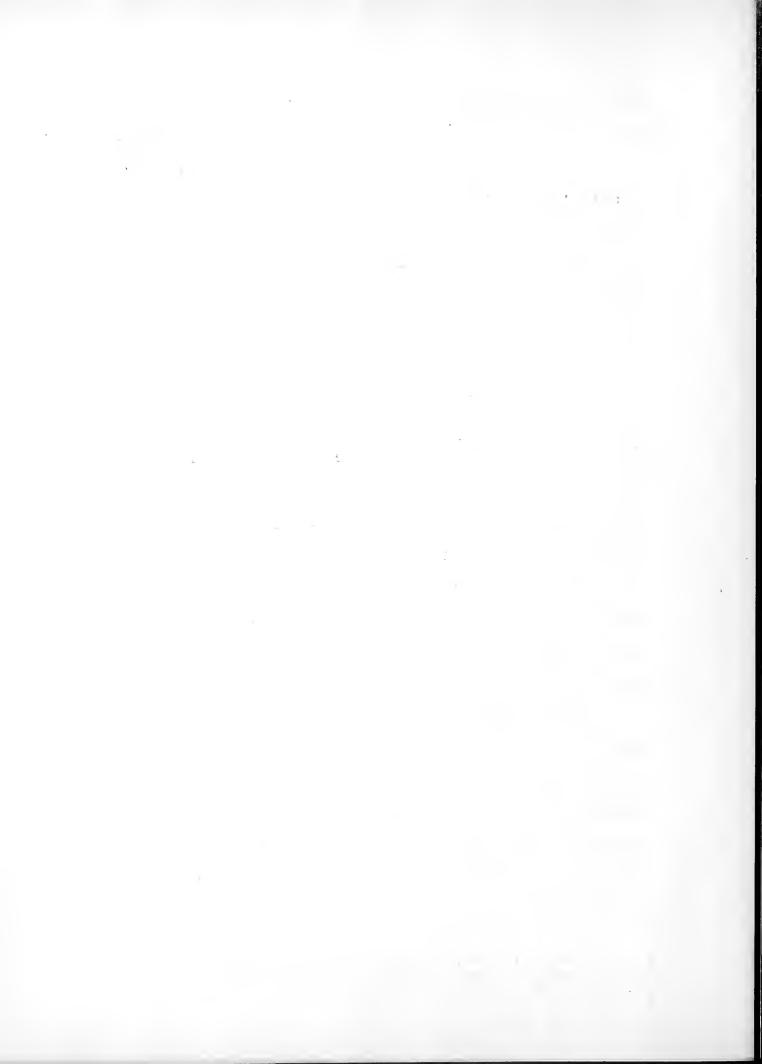

offered ten thousand dollars for the establishment of normal schools if the legislature would appropriate an equal amount (1). The offer was accepted and the act establishing the first normal school was passed (2). Authority being granted, one normal was established at Lexington, July 3, 1839, for women and another in Barre, September 5, 1839, for both men and women. At the opening of each school Covernor Edward Everett delivered an oration in which he outlined fully the course of study which was to be offered (3). The minimum course of study was fixed at one year, though two years might be devoted to it. The subjects of the first curriculum were: - (1) Orthography, reading. grammar, composition and rhetoric; (2) writing and drawing; (3) arithmetic (mental and written): algebra, geometry, bookkeeping; navigation, and surveying: (4) geography with chronology, stetistics and general history: (5) physiology: (6) mental philosophy: (7) music; (8) constitution and history of Massachusetts and the United States: (9) mental philosophy and astronomy: (10) natural history; (11) the principles of piety and morality; (12) the science and art of teaching with reference to all these subjects."

In this connection it is interesting to know that a Model School was established as an important feature of the schools (4). The location of the first two schools, however, did not prove adapted to the best results, and in 1844 that at Lexington was removed to West Newton, and 1 ter to Framington, and the Barre school, to Westfield. In 1840, the third school was established at Bridgewater (5).

The Normal School Idea in New York

In New York the first law on the subject of proper preparation of teachers was passed by the Legislature, April 13, 1827. The act was entitled "An act to provide permanent funds for the annual appropriation to common schools, to increase the literature fund, and to promote the education of teachers (1) However, the law made no special provision for the education of teachers. It simply provided for an increase in the literature fund. On may 2, 1834, the State of New York passed a law making provision for the education of teachers for common schools, The act was as follows:-(2).

Section 1. The revenue of the literature fund now in the treasury, and the excess of the annual revenue of said fund hereafter to be paid into the treasury over twelve thousand dollars or portions thereof, may be distributed by the regents of the university, if they shall deem it expedient, to be expended as hereafter mentioned.

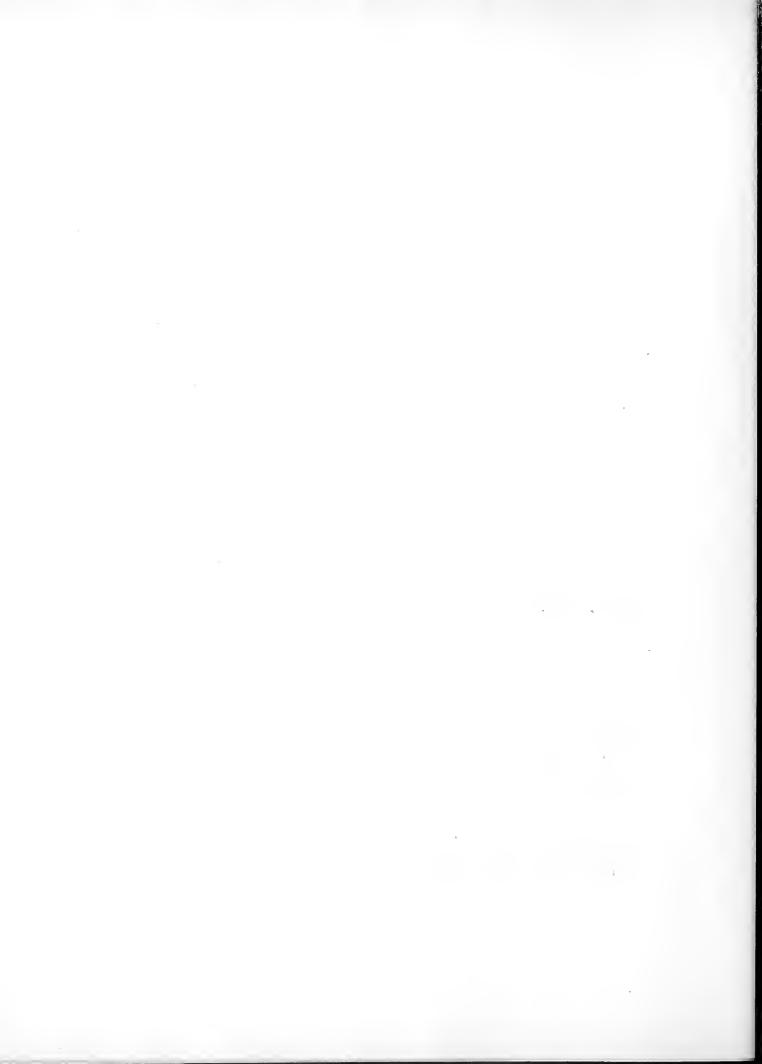

Section 2. The trustees of scademies to which any distribution of money shall be made by virtue of this act, shall cause the same to be expended in educating teachers of common schools in such manner and under such regulations as said regents shall prescribe.

On April 17, 1838, an act was passed providing for the expenditure of the income of the United States Deposit Fund (3). The 8th section of this act provided for the annual payment of twenty eight thousand dollars to the literature fund, to be

^{1.} New York Laws, 1827, p. 237.

^{2.} Ibid., 1834, p. 425.

^{3.} Ibid., 1838, pp. 220-3.

distributed among the academies in the several senatorial districts as the law directed. The 9th section of the same ect provided that: It shall be the duty of the regents of the university to require of every scademy receiving a distributive share of public money under the preceding section equal to seven hundred dollars per annum, to establish and maintain in such academy a department for the instruction of common school teachers, under the direction of the said regents. as a condition of receiving the distributive share of every such academy (1). These acts evidently had a most wholesome effect on the schools of the State of New York, for the State Superintendent on his report to the legislature for the school year 1838-9, said:" The standard has been raised, the demand for competent teachers has increased, and the supply has been materially sugmented. It should be made the interest of those who intend to be teachers to avail themselves of those departments. This could be effected by a legislative provision. declaring that a certificate of qualification given by the trustees of the academy under their seal should constitute the person receiving it a qualified teacher in the common schools of the state without any further certificate from the inspectors of the twwn."(2).

Chapter III

Establishment and Location

The Illinois State Normal University.

The first definite action taken by the Illinois legislature in regard to a Mormal School for the training of teachers for the schools of the State of Illinois, was during the session of the Twentieth General Assembly which convened at Springfield, February 1, 1857. An act as approved by the Governor, February 18, 1857, provided for the establishment and maintenance of a Mormal University (1). As this was the first instance of a Normal School being provided for in the State of Illinois, the act is of special interest and is given in full (See Appendix "A").

made no addition to its current expenses; it merely paid the income or interest from the <u>University and seminary fund</u> to the order of the "Board of Education of the State of Illinois," which it thereby created (2). Furthermore, the State gave nothing for the erection of buildings or the purchase of a site (3). These matters were to be settled by the citizens of the community in which the school should be located (4). It is significant to note that the question of location had been eliminated from the bill. This apparently had its effect

^{1.} Illinois Session Laws, 1857, p. 298-9.

^{2.} Ibid., p. 298- Sec. 8.

^{3.} Ibid., p. 298.

^{4.} Ibid., p. 298.

the bill would have been passed had it named any place as a cite. It will be noted that the act referred to styled the governing body "The Board of Education of the State of Illinois." (1). This title was transferred by the committee of the State Teachers' Association, called the State Board of Education, which prepared the bill (2). The institution which the Board of Education was to establish and control was named a "Rormal University" (3). The term "Normal University" was evidently used for the purpose of adding other schools of agriculture and mechanic arts (4) after the normal school should be established.

By the terms of the act it became the duty of the board to fix the location of the school at the place which afforded the most favorable inducements for that purpose: "Provided, that such location shall not be difficult of access or detrimental to the welfare and prosperity of said normal university(5). The inducements referred to were the only sources from which to get a building, or building funds, for the school. However, in order to advertise the conditions of the location or establishment of the school the next fall, an informal meeting was held at the office of the Superintendent of Public Instruction, in Springfield, March 26, 1857 (6), and committees

Note: - Then reference is made to the Report of the Supt. of Public Instruction it means that the Biennial Reports of the Presidents of the Normal Schools are to be found therein.

were then appointed to receive proposals for the location of the school (1). By previous agreement the Board met in the city of Peoria. May 7. 1857, for the purpose of opening and examining the various proposals made for the location of the University. It was found upon examination that four propositions had been made from the following places:-

> Washington, Tazewell county, offered in cash, land, and buildings, the sum of \$20,000.00.

The city of Batavia offered cash, land and buildings, estimated at \$45,000.00.

The city and county of Peoria offered cash and land estimated to be worth 80,032.00.

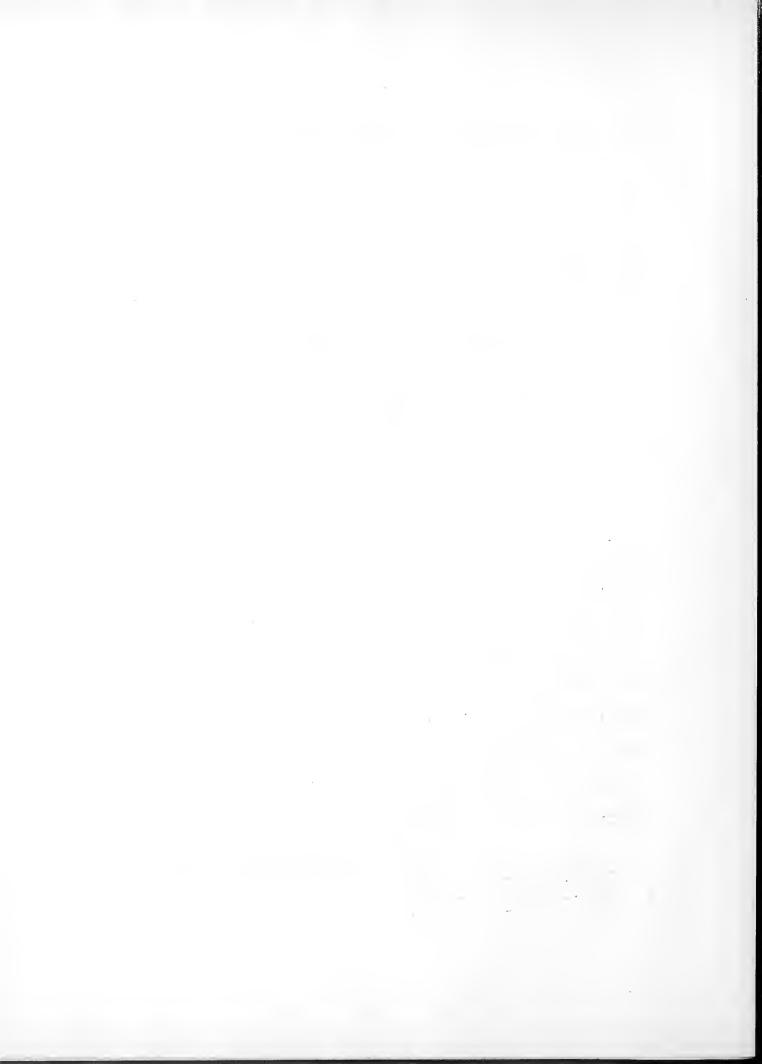

The city of Bloomington and county of McLean offered cash and land valued at 141.000.00.

The bid from Bloomington was so much larger than any other and at the same time so much larger that the Board had expected, that it was at once accepted, with the proviso, only, that deeds for lands and notes, with security for moneys subscribed, should be given. This was done accordingly and the institution was formally located in the town of North Bloomington, now Mormsl, about two miles north of the court house in Bloomington (3). It is interesting to note here that the guarantee bond was drawn by A. Lincoln, Esq., of Springfield, who acted as counsel for the Committee (4).

The Southern Illinois Normal University

Although the first normal school established in Illinois was successful from the beginning it did not fill the needs of southern Illinois. And in order to correct this condition the educational leaders of Illinois, owing to a misunderstanding, called two conventions to meet in the year 1868, one at Carbondale. June 24, and the other at Centralia, Aeptember 1. The credit of projecting the convention is due largely to the efforts of Rev. Clark Braden. President of Southern Illinois College, located at Carbondale. Among important questions discussed was: " The Mecessity of a State Mormal School in Southern Illinois." Among the eminent teachers participating in these discussions were such men as President Allyn, of Mc-Kendree College. Prof. Standish, of Lombard University, and Pres. Braden, of Southern Illinois College. The advocacy of a State Normal School for Southern Illinois was general, and the following resolution was unanimously adopted:-

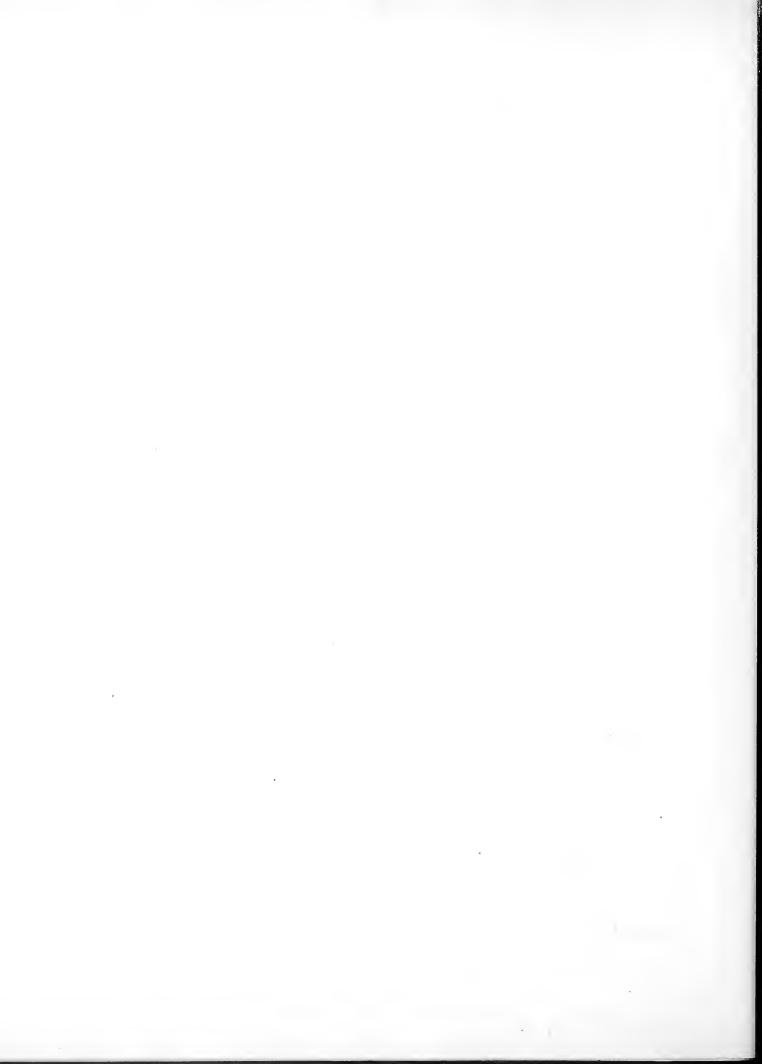

"Believing the time has fully come when the educational interests of Illinois demand more than one Rormal School, and that the people of Southern Illinois are ready to sustain an institution of this kind, either as an auxiliary school to our present University, or entirely independent of it, we carnestly solicit the co-operation of all educational men in the State in securing this result; therefore,

Resolved, That it is the earnest prayer of this convention that the county superintendents of the State, especially of Southern Illinois, unite in such measures as will secure an act from our next Legislature establishing a Normal School in Southern Illinois at least equal to our present Normal University, in all of its advantages." (1).

At the Centralia convention a like resolution was adopted, namely. That a State Normal School should be established by law in Illinois (2). On the 16th of October, 1868, the committee

2. Ibid., p. 71.

^{1.} Report of Supt. of Pub. Inst., 1867-8, p. 70.

appointed to take the subject of a new Normal School in charge, met and appointed a committee to prepare and circulate a petition to the Legislature in behalf of the abject, namely, the establishment of a normal school. The appeal was successful. Accordingly an act entitled "An act to establish and maintain the Southern Illinois Mormal University" was passed at the ensuing session of the State Legislature and approved by the Covernor, March 9, 1869 (1). A board of five trustees was appointed by the Governor. This board proceeded immediately to advertise for proposals from cities and towns desiring to secure the location of the new institution. In due time sealed proposals were received from towns and cities situated in the district defined by the terms of the act. The liberal offers made by the several competing localities evinced a remarkable interest in the proposed institution, and a high appreciation of the advantages to be derived from securing 1ts location. each of the competing points was visited by the trustees, and their respective merits and advantages were carefully examined and compared. It was, however, finally decided that Carbondale in Jackson County, was entitled to the location (2). The amount subscribed and pledged was estimated to be worth \$200,000.00. It afterwards appeared, however, that a portion of the bonds was illegal, and the cash value finally received by the State was very small compared with the pledges given (3).

3. Ibid., 1873-4, p. 157.

^{1.} Illinois Session Laws, 1869, p. 34.

^{2.} Report of Supt. of Pub. Inst., 1868-70, p. 87-8.

The Northern Illinois State Normal School

Superintendent of Public Instruction James P. Blade, in his report to the General Assembly in 1882, stated that, in his opinion, two, or better, three more normal schools should be established by the State in addition to the Illinois State Normal and the Southern Illinois State Normal (1). Two years later, Superintendent of Tublic Instruction Henry Raab, voiced the need of more State Mormal schools (2). The same thing was advocated by Superintendent Richard Evans (3). However, nothing was done by the Legislature in regard to establishing more schools. Finally in 1894. President John W. Cook of the Illinois State Mormal University in his report to the Superintendent of Dublic Instruction expressed a need of a normal school in Morthern Illinois (4). This seemed to bear fruit. Accordingly in 1895 bills were introduced into the General Assembly for the establishment of two new normal schools, and before the sense of surprise had died away they were enected into laws. (5).

The act mentioned above was approved May 22, 1895.

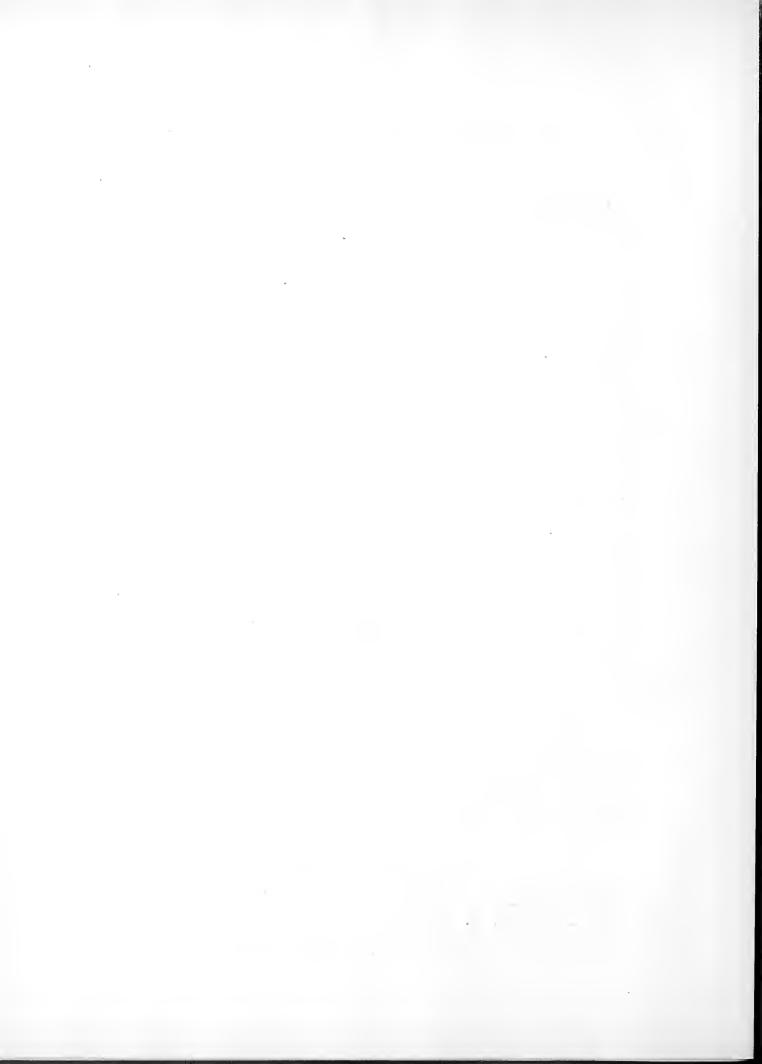

It provided that the location of one of the schools should be in that portion of the State north of the Chicago, Rock Island & Pacific Railroad with a view of obtaining a good

^{5.} Illinois Session Laws, 1895, pp.63 and 69.

water supply and other conveniences for the use of the institution. Trustees were appointed by the Governor to receive proposals for the donation of a site of not less than forty acres and other valuable considerations. It was also their duty to locate the institution in the place offering the most advantageous conditions. Rockford, Oregon, Polo and DeKalb were the chief bidders for the school. LeKalb, however, secured the location of the institution by guaranteeing over \$40,000.00 in addition to a besutiful farm of sixty four acres lying just adjacent to the town for a site for the proposed normal school (1).

^{1.} Report of Supt. of ub. Inst., 1898-1900, p. 101.

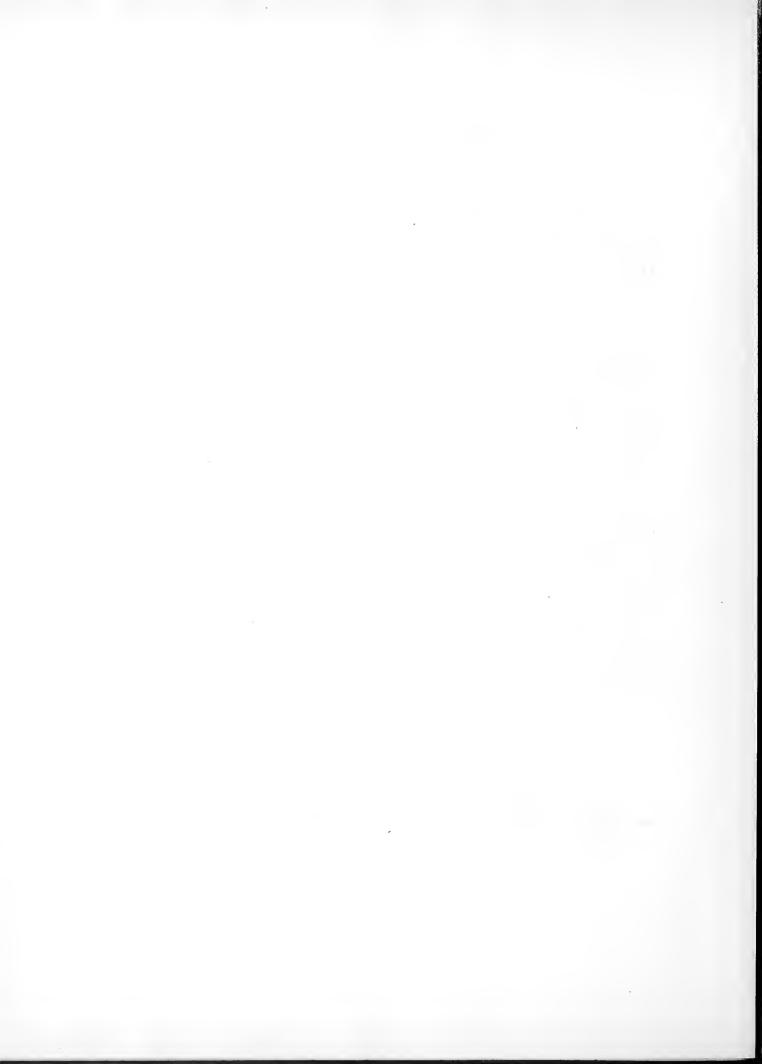

The Eastern Illinois State Normal School

To provide more adequate facilities for the training of teachers for the public schools of the !tate. the Legislature by an act approved May 22, 1895, established the Eastern Illinois State Mormal School. As provided for in the act, five trustees were appointed by the Governor to locate the school in that portion of the State offering the most advantageous conditions, all things considered, between the Beltimore & Ohio Southwestern Railroad, and south of the Wabash Railway, and east of the main line of the Illinois Central Railroad and the counties through which the said roads run, with a view of obtaining a good water supply and other conveniences for the use of the institution (1). On September 7, 1895, the five trustees selected a beautiful fortyacre tract of land three-quarters of a mile south of the public square of Charleston. The citizens of Charleston bought the land and presented it to the State (2).

^{1.} Illinois Session Laws, 1895, p. 64.

^{2.} Report of Supt. of Fub. Inst., 1914-16, p. 156.

The Western Illinois State Normal School

on April 21, 1899, by an act entitled "An act to establish and maintain the Mostern Illinois State Mormal School" it was provided by the Legislature of Illinois that a normal school should be erected and conducted in that portion of the State of Illinois lying west of the fourth principal meridian in what is known as the Military Tract. This act became effective July 1, 1899 (1).

spon after this act went into operation the Governor appointed a board of five trustees for the purpose of locating the school. In accordance with the limitations imposed by statute the board of trustees asked for the proposal of sites offering the best possible advantages. Various sites were proposed for the location of the school. The Board finally chose Macomb a town of about four thousand inhabitants. It is situated in the center of an enterprising and prosperous part of the State and is easily accessible from all parts of western Illinois. The site, comprising nearly sixty acres, was presented to the State by citizens of Eacomb and vicinity. The school was located August 14, 1900 (2).

^{1.} Illinois Session Laws, 1899, p. 72.

^{2.} Report of Supt. of Fub. Inst., 1914-16, p. 161.

Chapter III.

Buildings and Louipment

The Illinois State Normal University.

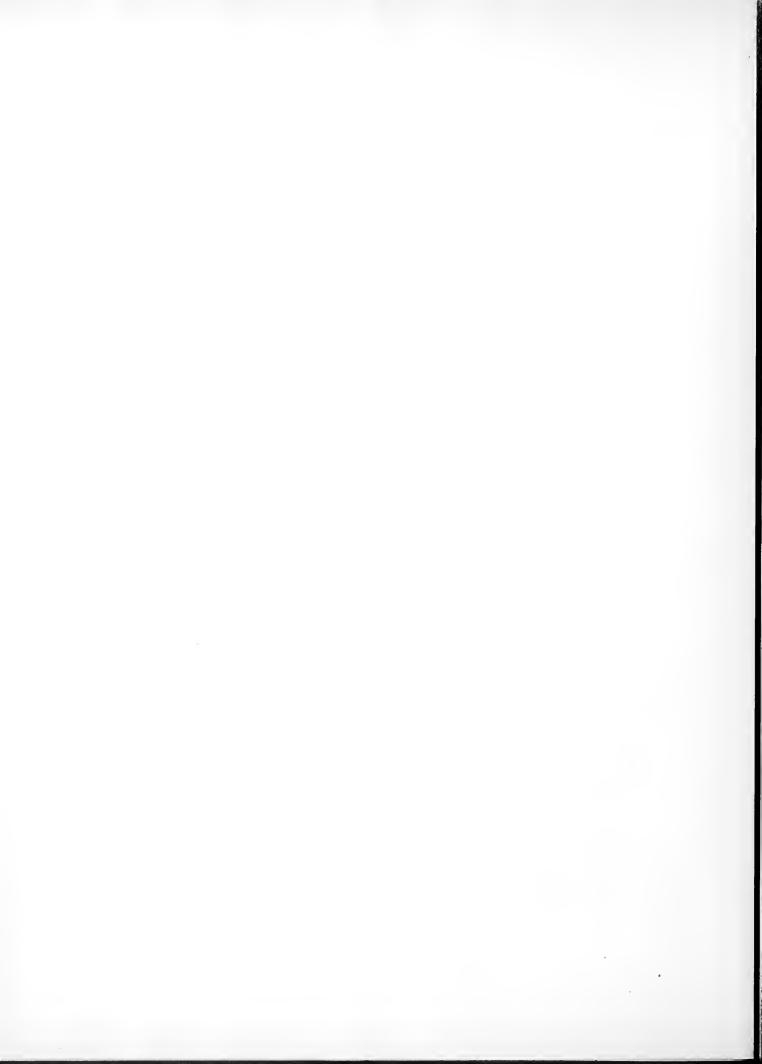

As the location of the school was decided upon, the next step was to elect a principal, or president. Two men were mentioned for the position, Er. Tillism F. Felps, of the hew Jersey Normal School, and Ir. Charles S. Fovey, Superintendent of the Secric Schools (1). At the meeting of the pourd in Bloomin ton, Jane 23, 1857, x. Sovey was appointed principal (1). Trevious to this, at a meeting of the woard in leoris, May 7, 1857, Messrs. Tex and Movey were appointed a committee to visit the various normal and high schools of the esst, and report to the Woard upon the subject of buildings, internal arrangements, etc. (3). They made a careful examination of the school architecture in Thiladelphia, Trenton, New York City, Albany and many cities in Connecticut and Massachusetts (4). On their return Mr. Fox, the chairman of the committee, submitted a report to the board recommending for adoption the plans of the ew Jersey normal school building. Mr. Hovey did not join in the recommendation as he believed a better plan for his purpose could be devised (5).

^{1.} Report of Eupt. of Lub. Inut., 1887-8, p. RCV.

^{2.} Ibid., p. XCV. 3. Ibid., 1857-8, p. 367.

^{4.} Semi-Cent. First. of the I.B. p. 11.

^{5.} Ibid., p. 11.

Accordingly Mr. Hovey conferred with Mr. G. P. Bandell, of Chicago, who had been engaged by the Board as architect. Plans and specifications were propered and a contract was entered into for the construction of a building which was to be completed on or before September 1, 1858 (1). The cornerstone was laid September 29. 1857, with appropriate ceremonies. in the presence of a large number of the citizens of Bloomington and the surrounding county. The foundation was laid, but financial revulsion and unforeseen difficulties compelled a suspension of the work (2). However, it had been previously decided to open the school on the first Monday in october. 1857 (3). In order to be able to do this temporary rooms were secured in Major's Hall, in Bloomington, for the purpose of opening the school at the appointed time, October 5, 1857 (4). When the first Monday of October came, the deaks and chairs ordered had not been received, and some rough oak benches, without desks, were all the furniture for the students (5). Notwithstanding the lack of equipment the school continued in this building until September, 1860, when school orened in the new building which was finally completed and dedicated in January, 1861 (6).

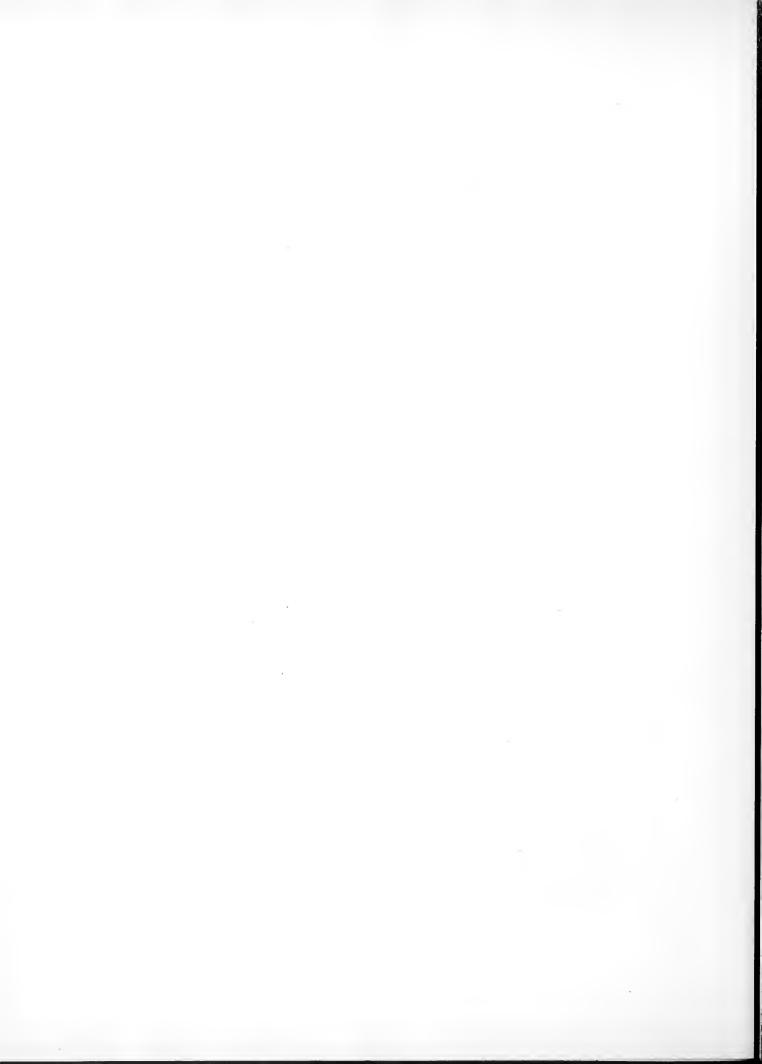

^{1.} Report Supt. of Jub. Inst., 1857-8, p. 369.

^{2.} Ibid., 1857-8, p. 361.

^{3.} Ibid., 1857-8, p. 368.

^{4.} Ibid., 1857-8, p. 389. 5. Ibid., 1887-8, p. XCVII.

^{6.} Semi-Cent. Hist., op. cit., p. 34.

As we have stated above, the General Assembly made no provision for the erection of a building for use of the normal school which it had established. However, in order that the first structure might be completed, an appropriation of \$65,000 was made by the State Legislature in 1861 (1). No further material equipment was added to the school until the State appropriated 44,000 for a boiler house and heating appearatus in the year 1889 (2). Following this, the next legislative assembly made an appropriation of "18,000 for a training school building (3) which contains a high school assembly room, classrooms for the high school, elementary school and the kindergarten, laboratories for agricultural and natural sciences, domestic schence, play and rest rooms.

In the year 1895, #40,000 was appropriated for a gymnasium building (4). The building has three floors: - the gymnasium, baths and dressing rows are on the first floor, the commercial department on the second; and the biological laboratories on the third floor.

A Manual Arts building was provided for in 1907 (5). Basides furnishing a building for classrooms, laboratories for chemistry and physics; and offices, it contains a modern auditorium with a seating capacity of 1115 persons.

^{2.} Ibid., 1889, p. 57.

^{3.} Ibid., 1891, pp. 61-2.

^{4.} Ibid., 1895, pp. 76-7. 5. Ibid., 1907, pp. 26-7.

In 1905 an appropriation of \$80,500 was made for a new plant house and equipment (1). This was followed in 1911 by a further appropriation of "125,000 for a new building to house the Training School and the University High School(2). This was completed and in use in 1913.

President Felmley in his report to the Superintendent of Public Instruction in 1914-16 stated that the greatest need of the school was a Toman's Building. As a result an appropriation of \$95,000 was granted (3).

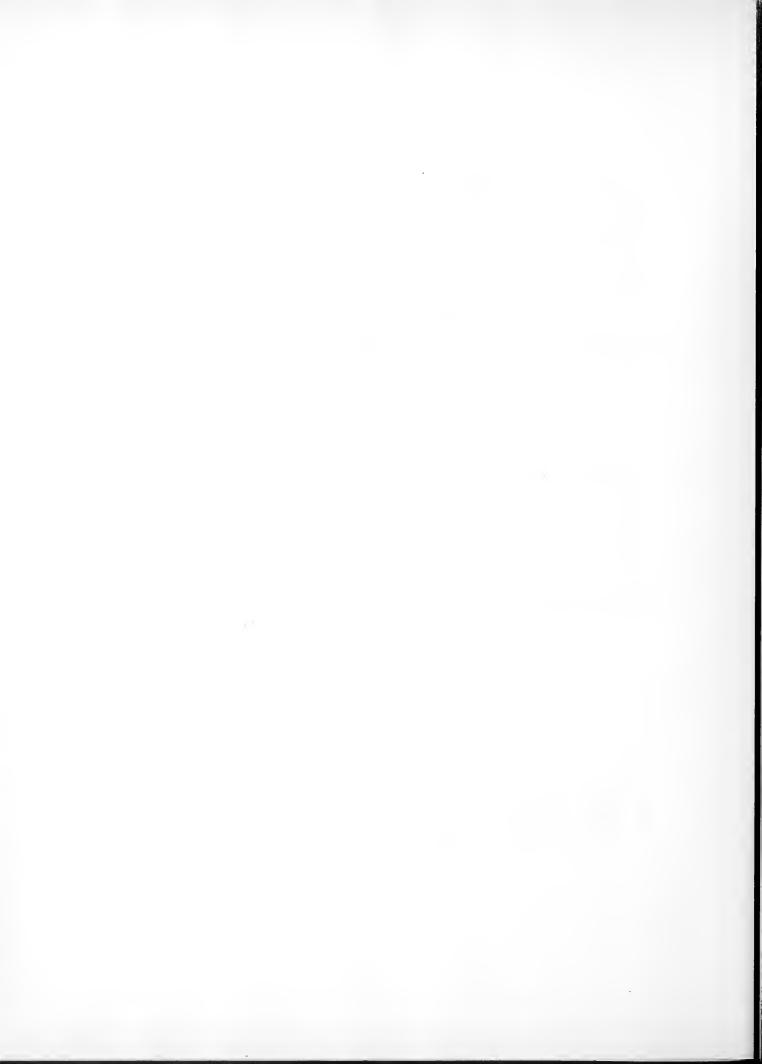

Since the passage of the Lindley Bill in 1905 provided scholarships from the township high schools, a university farm of ninety acres has been maintained as an important adjunct to the material equipment. This is thoroughly equipped with stock, implements and utensils for training in agriculture on an intensive scale (4).

The Southern Illinois Normal University

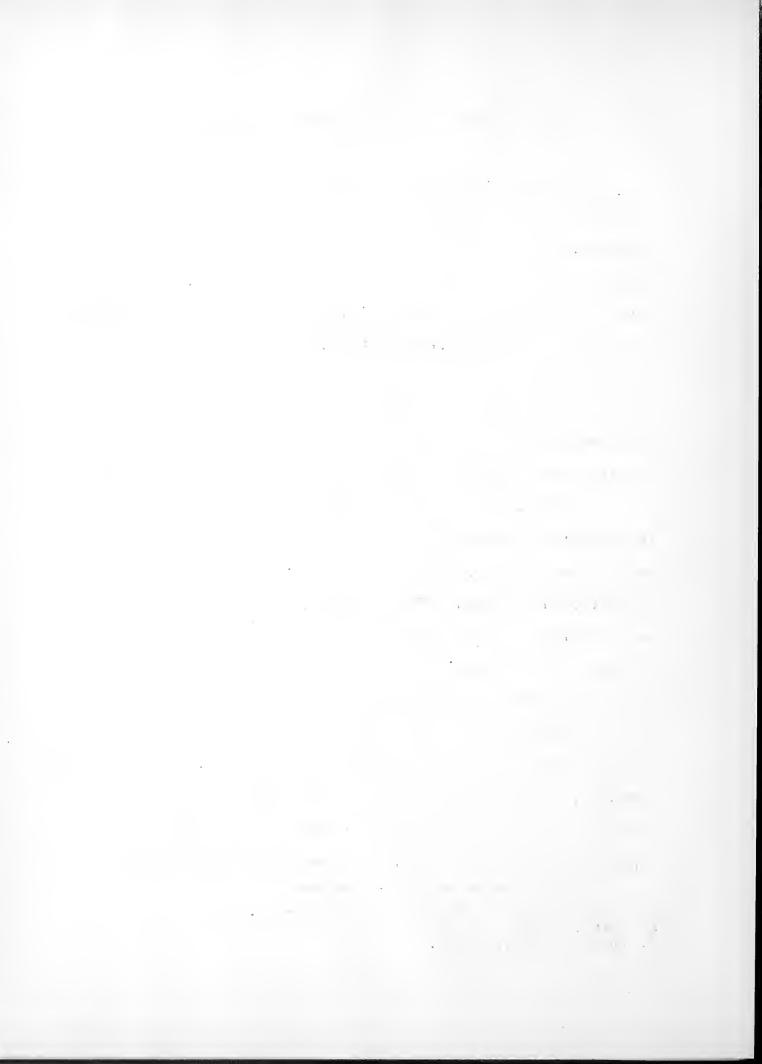

An act of the General Assembly of the State of Illinois approved April 20, 1869, provided for the establishment of this normal school. By this act it was ordered that five trustees should be appointed by the Governor of the State, who should fix the location, erect the buildings, and employ teachers for the school. The trustees located the school in the town of Carbondale on a lot of twenty acres, three-quarters of a mile south of the station of the Illinois Central Esilroad. The cornerstone was laid on the 27th day of May, 1870 (1). The building was finished in time to be dedicated July 1, 1874 (2).

On the afternoon of Movember 26th, 1883, at three o'clock the beautiful building was discovered to be on fire, and before five o'clock, despite the offorts of the faculty, students, and citizens of Carbondale, the entire building was in ruins. By the heroic labors of students, teachers and citizens, the library was saved, and most of the furniture; also the chemical and physical apparatus. All the material in the museum was lost (3). The citizens kindly offered the use of rooms in some of the business blocks, which the trustees accepted, and the school went on, with the actual loss of less than two days. In the meantime a plan was proposed for a temporary school building, and in less than sixty days a

^{2.} Ihid., 1873-4, p. 16.

^{3.} Ibid., 1883-4, p. 18.

building was completed containing fourteen rooms, and the Normal School began its wonted studies in this temporary home.

The General Assembly, by an act approved June 27. 1835, appropriated \$152,065 to replace the first building (1). The foundation and stone valls of the first story were utilized, thus saving \$12,000 to \$15,000 (2). This building, which is the main one of the entire plant, is a magnificant structure, in many respects superior to the one destroyed by fire. It was dedicated February 24, 1887, and occupied by the school the following Monday (3).

The Ecience Building was provided for by the Legislature in the winter of 1895 by appropriating \$40,000 for the purpose(4). It accommodates the physical, chemical and biological laboratories, the museum, gymnasium, manual training and agriculture departments. It was completed in the fall of 1895, and dedicated in 1896.

The Library Suilding was crected in the fall and winter of 1903-4, at a cost of \$30,000, toward which the General Assembly had appropriated *25,000 in 1903 (5). It was dedicated on June 7, 1904 (6).

The Forty-fifth General Assembly made an appropriation of \$50,000 for the erection of a modern Model School Building (7). This building was completed within the appropriation late in December, 1908, and added very much to the material equipment

^{7.} Laws, op. cit., 1907, p. 27.

of the institution. It was dedicated with appropriate ceremonies on January 11, 1909. This building is named in honor of the late President Tobert Allyn (1).

The Forty-seventh Assembly made an appropriation of \$75,000 with which to establish a Momen's Building (2). This structure, now known as Anthony Hall, was completed in the fall of 1913, and was dedicated on October 23, 1913. A new light, heat and power plant was roylded for by the General Assembly in 1913 by an appropriation of \$50,000 (3). This was followed by an appropriation of \$135,000 in 1915 for the construction of an Administration and Auditorium building (4). For various reasons the erection of the structure was a slow process. It was, however, opened for the first time April 4. 1918 (5).

In the spring of 1907, at their regular meeting the board of trustees expressed the desirability of offering instruction in agriculture by setting aside a tract of land on the school campus about two acres in area. Upon this tract is located the school garden. It is also furnished with up-to-date farm implements for demonstration purposes (6).

A Library of fifteen thousand volumes was selected as a beginning (7). This has been increased to about twenty thousand volumes in addition to about one hundred permodicals and newspapers which are kept on file (8).

The Northern Illinois State Normal School

The original act establishing the school carried with it an appropriation of \$50.000 for buildings and the first year's instruction (1). The trustees who had previously been appointed, engaged ar architect, plans were adopted, and the cornerations was laid october 1, 1895 (2). This building was especially designed for normal school purposes; it is 371 feet long and 250 feet in depth. It contains a specious auditorium, class rooms, library halls, and apartments for various student enterprises in addition to library accommodations, a symmetium, and a manual training shop (3). The building was dedicated Scrtember 22, 1899 (4).

On several occasions the President in his report to the Superintendent of Public Instruction had expressed a need of a Toman's Building. As a result of the appeal \$125,000 was appropriated for the purpose (5). It contains both single and double rooms and can accommodate one hundred thirty women.

The large influx of students soon made it imperative that some provision be made for a training school building. Consequently, the Legislature appropriated \$75,000 in 1909 for this purpose (6). The fourth building to be erected was a green house for the purpose of supplying plant life for the various classes. It is under the care of a skilled gardener.

^{2.} Report of Supt. of Pub. Inst., 1898-00, p. 101.

^{3.} Catalog, Nor. Ill. State Normal, 1903, p. 9.

^{4.} Report, op. cit., 1908-10, p. 636.

^{5.} Laws, op. cit., 1913, p. 21.

^{6.} Ibid., 1909, p. 39.

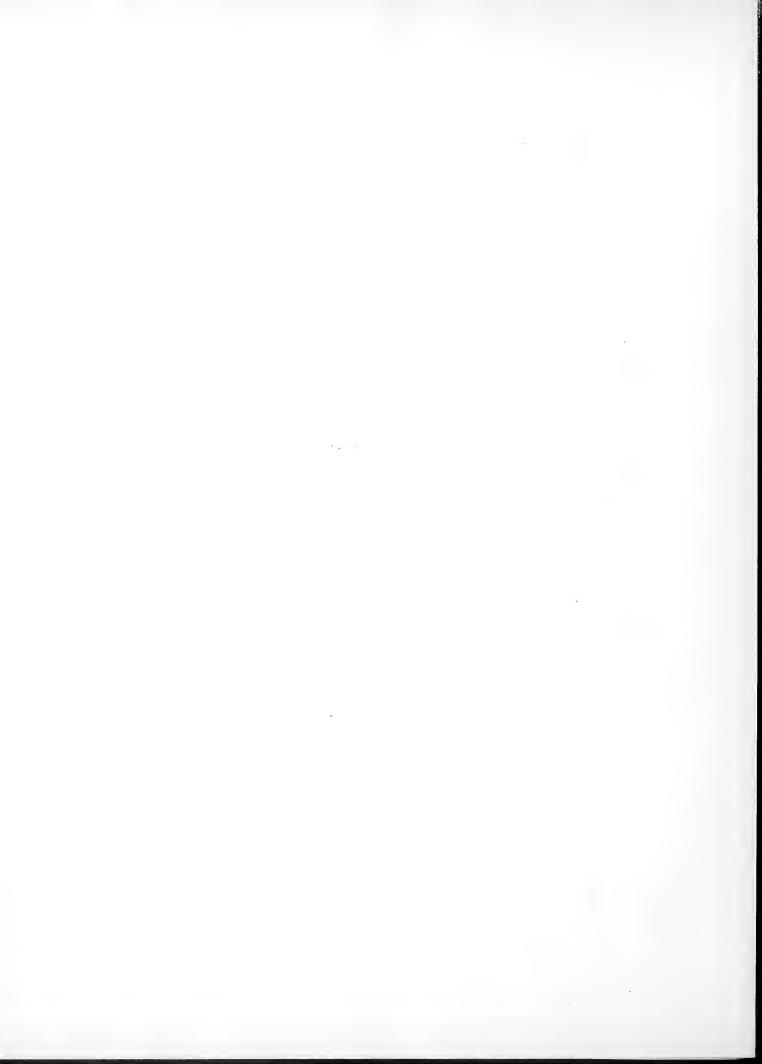

The Library is well supplied with books of reference, periodicals, and newspapers.

In the physical and biological laboratories ample equipment is provided for the proper study of those sciences.

As we have noted above, the immediate needs of the school, so far as buildings are concerned, are well provided for. Therefore, there are reasons for us to believe that a high class of work may be carried on by the students of the school.

Note, -

It will be noted that no references are given for the erection of the green house, library, and the laboratories. In the cases of these buildings either no special legislation was enacted or it was not recorded. It is quite probable that buildings or rooms have been utilized at nominal cost.

The Fastern Illinois State Jormal School

the Fastern Illinois formal School, it also provided an appropriation of \$50,000 for building surposes (1). The board of trustees immediately secured plans for a building.

The contract for the erection of the first building was made December 2, 1895 (2), and the corner stone was laid key 27,1896(3). The building and grounds were dedicated August 29, 1899 (4).

In 1907, the State legislature appropriated \$100,000 for a Toman's building (5). This building was finished and occupied January 4, 1909 (6). In addition to providing a home for one hundred young women during the school year, it has had a marked influence in establishing good standards of living, and has come to be the social center of school life.

was completed in 1913 within the original appropriation. It is placed conveniently near the main building, and besides the elementary school rooms it contains the class rooms and laboratories for domestic science and agriculture.

^{1.} Illinois Session Laws, 1895, p. 63.

^{2.} Catalog, Rast. Ili. Diste Hormal, 1920, p. 17.

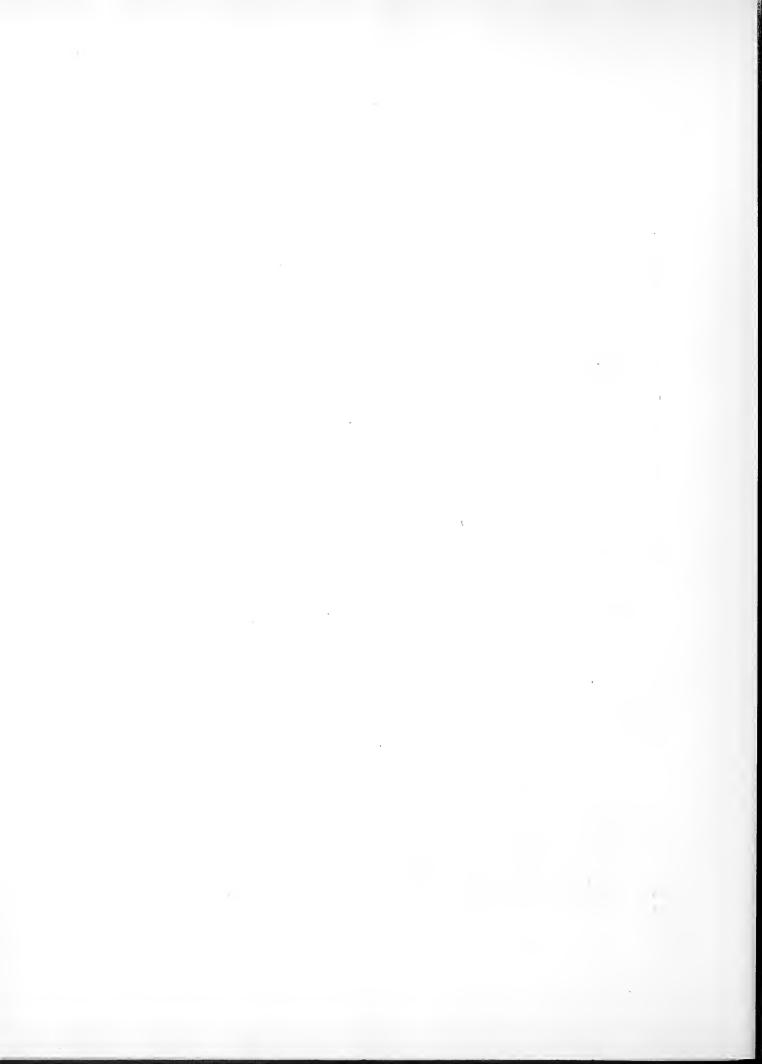

^{3.} Ibid., p. 17.

^{4.} Catalog, op. cit., 1912-3, p. 10.

^{5.} Laws, o . eit., 1907, pp. 26-7.

^{6.} Catalog. op. cit., 1920, p. 19.

^{7.} Laws, op. cit., 1911, p. 50.

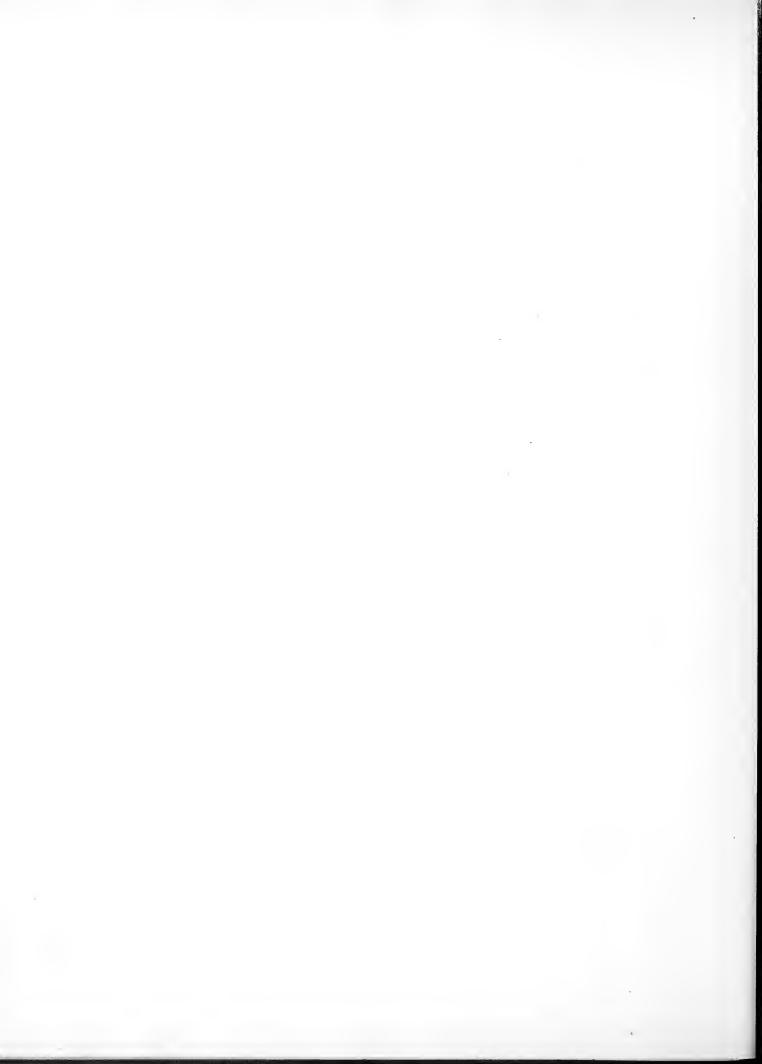

The normal school grounds comprise forty acres, including the campus proper, the forestry, and the athletic field. For work in manual training and mechanical drawing, the school has a well equipped building at a convenient distance from the main building. The botany, zoology, physiology, physics, chemistry, and agriculture laboratories are well equipped with apparatus for demonstration and for individual work (1).

The school garden and greenhouse provides opportunities for practical experimental and demonstration work in the plant world, - the method of propagation, crop rotation, and some of the principles of plant breeding.

The library now contains over twenty-three thousand books and pamphlets (2). Here are also found the current numbers of over one hundred twenty five periodicals, including in addition to those of general interest, many devoted to special subjects (3).

^{1.} Catalog, Hast. Ill. State Normsl, 1920, p. 21.

^{2.} Ibid., p. 20. 3. Ibid., p. 20.

The Restern Illinois State Mormal School

the estern Illinois State Normal School, \$75,000 was appropriated for a building, furniture, and the improvement of the land, etc. (1). It was soon found that this amount was insufficient. Accordingly the next General Assembly made an appropriation of \$227,950 with which to finish the construction of the building (2). Eventually it was found that the building cost more than \$400,000 (3). The building is fire-proof throughout and contains the offices of the administration, the library, the training school and many recitation rooms. It is three stories sigh and is built of Berean stone and brick. The cornerstone was laid December 23, 1900 (4), and it was sufficiently finished that school was opened in it on December 23, 1902 (5).

In 1911, the State Legislature appropriated 75,000 for a Woman's Building for the institution(6). Two years later \$10,000 was appropriated to furnish the building. After various delays, the formal opening occurred on January 23, 1914 (7) although there were still some things to do b fore it would be entirely finished. There are enough rooms to accommodate eighty five girls, and the dining room will seat one hundred twenty (8).

^{8.} Ibid., p. 430.

The Forty-ninth General Assembly appropriated \$5,000 for the erection of a new building to be used for the Arts pepartment (1). Nork commenced in August 1916, and the building, which is located northeast of the main building, is fire-proof and adds much to the opportunities to the school. The subsequent session of the Legislature appropriated \$40,000 to finish and furnish the building (2). New equipment has been added for manual training and household arts. It was dedicated June 12, 1919 (3).

of trustees expressed the desirability of offering instruction in agriculture by setting aside a tract of land on the school campus about two acres in area. Upon this tract is located the soil experimental field containing forty plots for the school garden. Recently arrangements have been made so that two firms furnish up-to-date farm implements for demonstration purposes (4).

A Library of 15,000 volumes was selected as a beginning(5). This has been increased to 19,352 in addition to about 100 periodicals and newspapers which are kept on file (6).

Chapter IV.

Administration

Frevious to 1917

According to the provisions of an act approved February 18, 1857 (1), establishing the Illinois State Rormal University, the control was vested in a board of trustees called "The Board of Education of the State of Illinois" consisting of fourteen members in addition to the superintendent of public instruction who became an ex-officio member. It was his duty to act as secretary of the board and to report to the legislature at its regular sessions the condition and expenditures of the normal university and such other information as the board of education and the legislature might direct. All subsequent members of the board were to be appointed by the Governor with the consent of the Senate for a term of six years. The board of education had the power to fix the location of the university, to appoint a principal, lecturer on scientific subjects, instructors and instructresses, together with such officers as should be required in the normal university, to fix their respective salaries and prescribe their duties. They also had power to remove any of them for proper cause, after having given ten days' notice of any charge which may have been presented and reasonable opportunity for defense. The board also prescribed the text books, apparatus and furniture to be used in the university, and made all regulations necessary for its management. At the first meeting of the board, and at each biennial meeting thereafter, it became the duty of the said board to elect one of their number president, who should serve until the next

^{1.} Illinois Session Laws, 1857, p. 298.

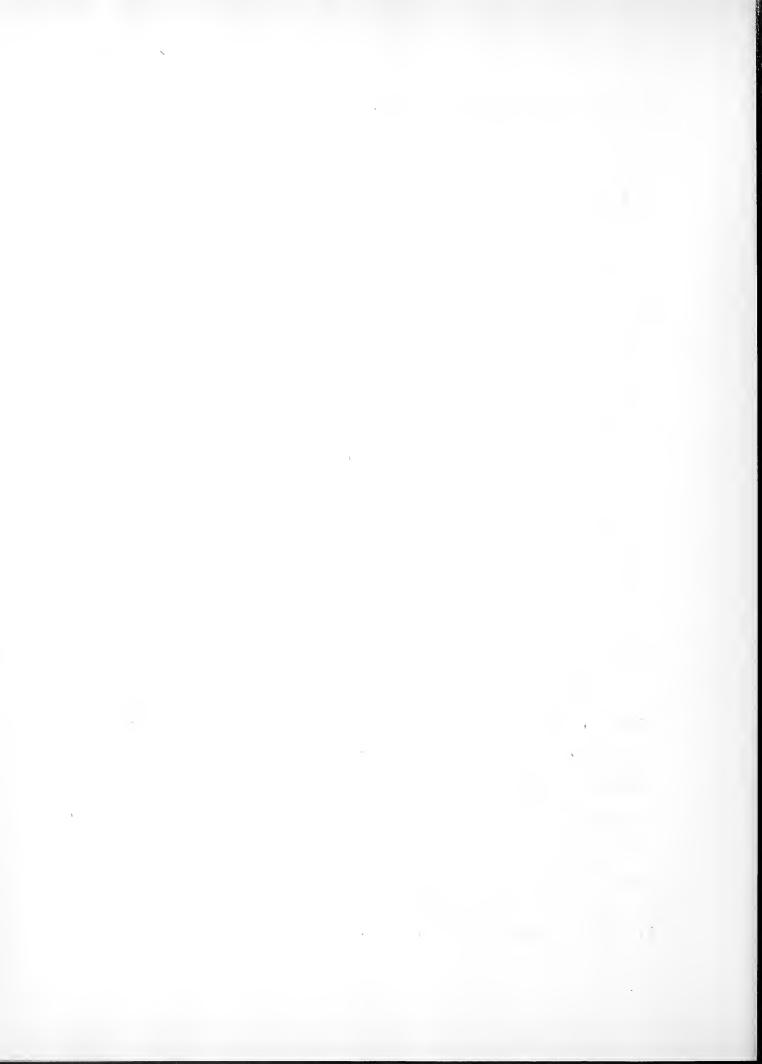

biennial meeting of the board, and until his successor was elected. At each biennial meeting it also became the duty of the board to appoint a treasurer, who should not be a member of the board, to handle all moneys received and expended.

Referring to the act mentioned above, it will be noted that the principal was not given the power to conduct the administrative and financial affairs of the normal university. While he was the official head of the university, he could not guide and direct the normal university affairs without the advice and consent of the board of education. It should be noted at this place that the principal acted in an advisory capacity to the board of education in all matters concerning the welfare of the institution. He was delegated the power of directing the said school in the absence of the board of education, and required to report to them concerning the need and condition of the school. This manner of administration and control continued until the enactment of the Civil Administrative Jode which will be explained in a later paragraph.

March 9, 1869 (1), created a body called the Touthern Illinois Mormal University. The objects of the university were to qualify teachers for the common schools of the state by imparting instruction in the art of teaching in all branches of study which pertain to a common school education. The powers and duties of this corporation were vested in a board of trustees,

^{1.} Illinois Session Laws, 1869, p. 34.

not exceeding five in number, which were ap ointed by the Governor with the consent of the Senate for a period of four years. Two members of the first board served but two gears, thereby making the board a continuous one. The board had power to elect one of its members as president and another as secretary, but the treasurer could not be a member of the board of trustees. The trustees were required to state and settle accounts with the auditor of public accounts, or to any other person or persons as designated by law for the purpose. They were further required to submit to the Governor ten days previous to each regular session of the General Assembly a report of their setions and proceedings, and to be by the Governor laid before the General assembly. The board of trustees, according to the terms of the act, were to meet at least quarterly for the transaction of business, for which they were to receive their personal and traveling expenses only. They had power to appoint instructors, and such other officers as were required in the said normal university, to fix their seleries and prescribe their several duties. Furthermore, they had power to prescribe textbooks, apparatus, etc., to provide the same and to make regulations for its management. The principal, or president, after his appointment by the board of trustees became the official head of the school, whose duty it was to report to the board at stated intervals. The goneral report, however, was made to the General Assembly biennially.

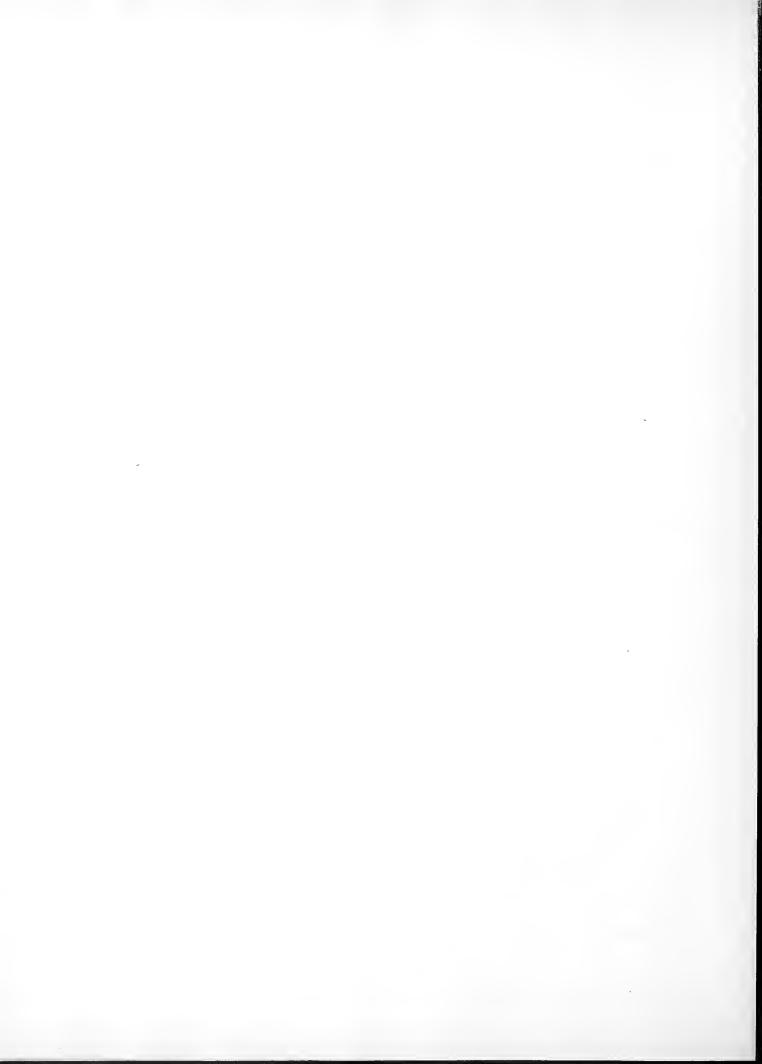

Then the Northern Illinois normal school and the Asstern Illinois Normal School were established in 1895 (1), the control of each school was vested in a board of five trustees with the Superintendent of Jublic Instruction an ex-officio member. They were delegated the same powers given the board of trustees of the Southern Illinois Normal University indicated above. Although the trustees were primarity responsible for the condition and success of the school to which they were connected, the principal, after his election, became the official head. In general, it may be stated that the principal simply acted as an advisor to the board of trustees in their administration of the affairs of the normal school; the principal made known his needs for the school and the trustees provided them.

was placed in the hands of a board of five trustees appointed by the Covernor. They were given the power of transacting any and all business relating to the normal school, the appointment of officers, the providing of equipment, the election of instructors, and the administration of the effairs of the uchool. The principal, likewise, after his election was entrusted with the business of conducting the school in an efficient manner, reporting biennially to the General Assembly on the condition of the school. The affairs of the school continued to be administered by a board of trustees until July 1, 1917, when they passed under the control of the reportment of Registration and Education, to the conditions of which we shall now give our attention.

^{1.} Illinois Tersion Laws, 1895, pg. 65 and 69.

^{2.} Ibid., 1899, p. 72.

The Civil Administrative Code

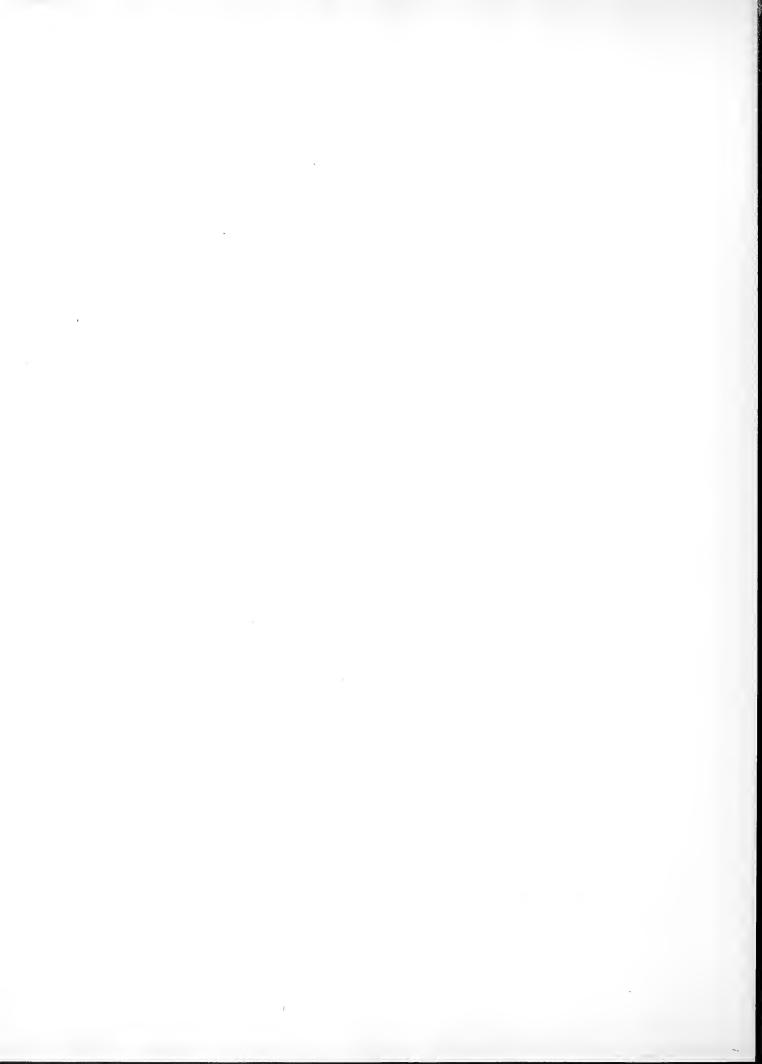

the liftiath general resembly, the five separate boards of trustees in charge of the tate normal schools were succeeded by the tate normal schools were succeeded by the tate normal schools were succeeded by the tate normal school Board, consisting of nine members appointed by the Sovernor, and two ex-officio members — the irector of the epartment of legistration and ducation, who is designated as Obsirman of the Roard and the uparintendent of Sublic Exstruction, who is designated as accretary of the loard. The trustees are appointed for six years each, three members being appointed every two years. The board is, therefore, a continuous body. It assumes all the duties originally administered by the leveral boards of trustees. We set is an important one, the essential beatures of thich are given (1):

"The Department of egistration and ducation shall

heve power :-

"The Normal School To rd, of wick the birector of Registration and Education shall be chairman and exofficio member and of which the uperintendent of ublic Instruction shall ex-officio be a member and shall be secretary, shall have power and it shall be its duty.

^{1.} Illinois Session Laws, 1917, p. 51.

independently of the supervision, direction or control of the Director or any other officer of the Lepartment of Registration and Education:

- "1. To make rules, regulations and by-laws, not inconsistent with law, for the good government and management of the State normal schools and the various interests therein:
- 2. To visit each State normal school at least once during each scholastic year for the purpose of making an inspection of its condition and work and gathering such information as will enable them to perform their duties intelligently and effectively;
- 3. To employ, and, for good cause, remove a president of each State normal school and all necessary professors, teachers, instructors, and other educational assistants, and all other necessary employees, and fix their respective salaries;
- 4. To prescribe the course of study to be followed, and text books and apparatus to be used in each tate normal school:
- 5. To issue, upon the recommendation of the faculties of the respective normal schools, diplomas to such persons as shall have satisfactorily completed the required studies of the respective State normal schools, and confer such professional degrees as are usually conferred by other institutions of like class for similar or equivalent courses of study:
- 6. To examine into the conditions, management, and administration of the State Mormal schools;
- 7. To succeed to and to administer all trusts and trust property now or hereafter belonging or pertaining to any of the State normal universities or schools."

Referring to section 2 above, it will be noted that the law requires that the board chall hold at least five meetings each year, one at each of the five normal schools. As a result the board will have first hand knowledge of the affairs of the schools and be better enabled to administer to them properly. Further comment as to the working of the law is left for the concluding remarks of this paper.

The Northern Normal reports "Salaries and "ages for the year ending June 30, 1916.

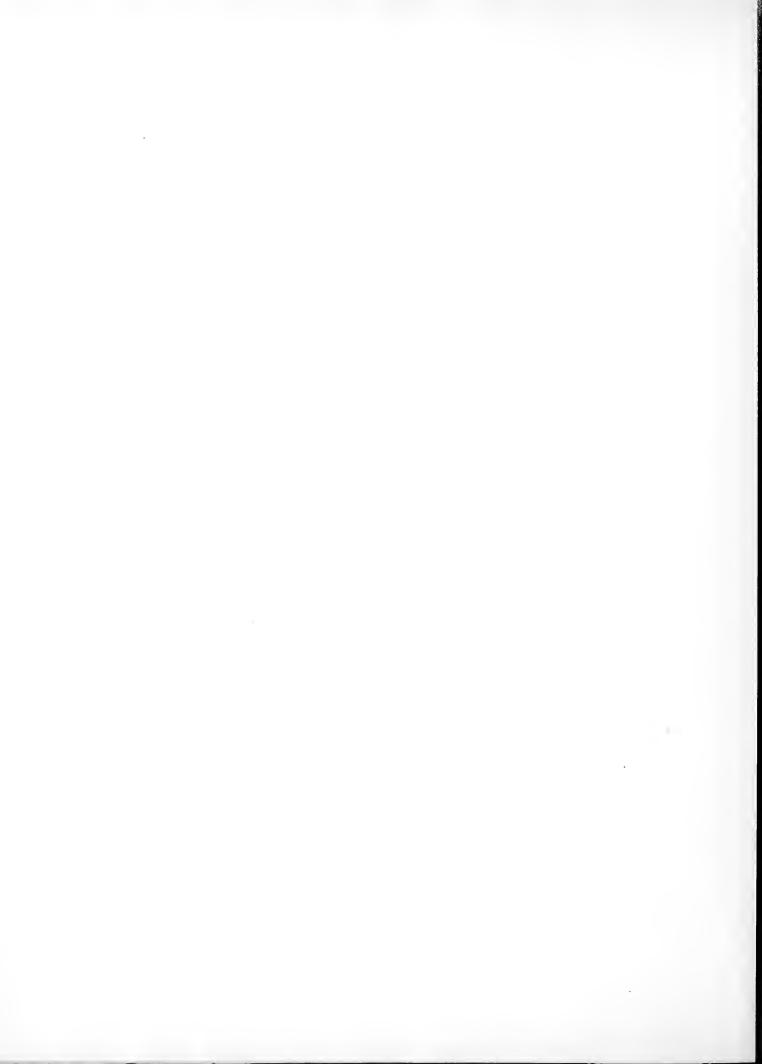

The Southern Illin is Normal received a Salary appropriation for the year ending June 30, 1915.

The "Ave. Sal. of Instructors, No. Rupils per Fchr., and Cost of Instr'n per pupil yrly.," are everages computed by the writer.

condition of the schools for the years indicated. The number of students enrolled for the years mentioned may or may not have been enrolled for the three terms of the school year. It merely indicates the number of different students enrolled. Furthernore, the summer school students were enrolled for but six weeks each year, and they also may or may not have been present during the regular normal schoolyear. Buch being the condition, the data are not as reliable as we would like.

maintenance shows a gradual increase for the periods given as well as the amounts paid for instruction yet the average yearly salary does not show the same proportionate increase. This is due to the fact that many of the instructors were employed for the summer term only thereby increasing the number under that caption. The lowest average salary per year paid instructors was \$727.50 for the first year the Illinois State Normal University was in session, while the highest average salary, \$2,316.24, was paid the instructors of the Southern Illinois Normal niversity for the year 1910. The number of pupils per teacher varied from eleven, in 1858, to fifty-three in 1910, the Illinois Tate Normal showing both extremes. In the cost of instruction per pupil yearly the amounts very from \$31,08 in 1910 to \$0.94 in 1900.

Chapter VI.

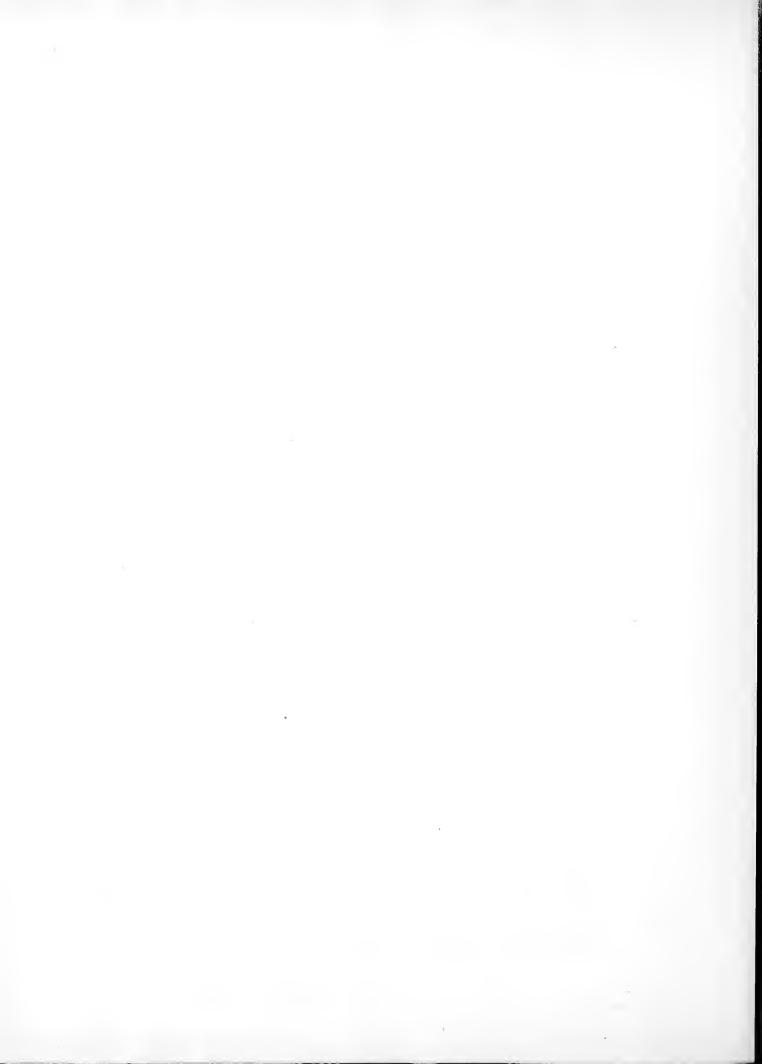

The Development of the Course of Study
The Illinois State Hormal.

The course of study pursued by the students enrolled during the first year was a review of the branches usually taught in the Tublic Schools. At first came a drill on the elementary sounds of the reglish language, Tollowed by Reading, and a careful examination of the thought and expression of the suther. Parallel with this ran the course in Mental and Tritten Arithmetic; the construction of Maps; Descriptive, Physical and Political Acography; English Granmar; Thysiology; yocal Music; and the Theory and Art of Leaching (1). The course of study was not adopted and published until after the first class was graduated in 1860. It is given below (2).

^{1.} Meport of Supt. of Pub. Inst., 1857-8, p. 382.

^{2.} Ibid., 1859-60, p. 111.

From a study of the course as mentioned above, it will be seen that the greatest amount of time was given to the study of the English Language, odel Masic, Ariting and Drawing. Geography, and the Mistory and Jethods of Education. There was no provision for practice teaching or observation. However, as the Training School was not established until Ceptember, 1874, there was no real need of the courses at that time.

From the Annual Latalog of 1876-7, we take the following course of study. There is no indication as to the amount of time given to each branch. It merely indicates the subjects (1).

*Observation in Model Tensol

*Theory and Fractice of Teaching
Psychology

*Bistory of Aducation

*Philosophy of Aducation

Constitution of the U. A.

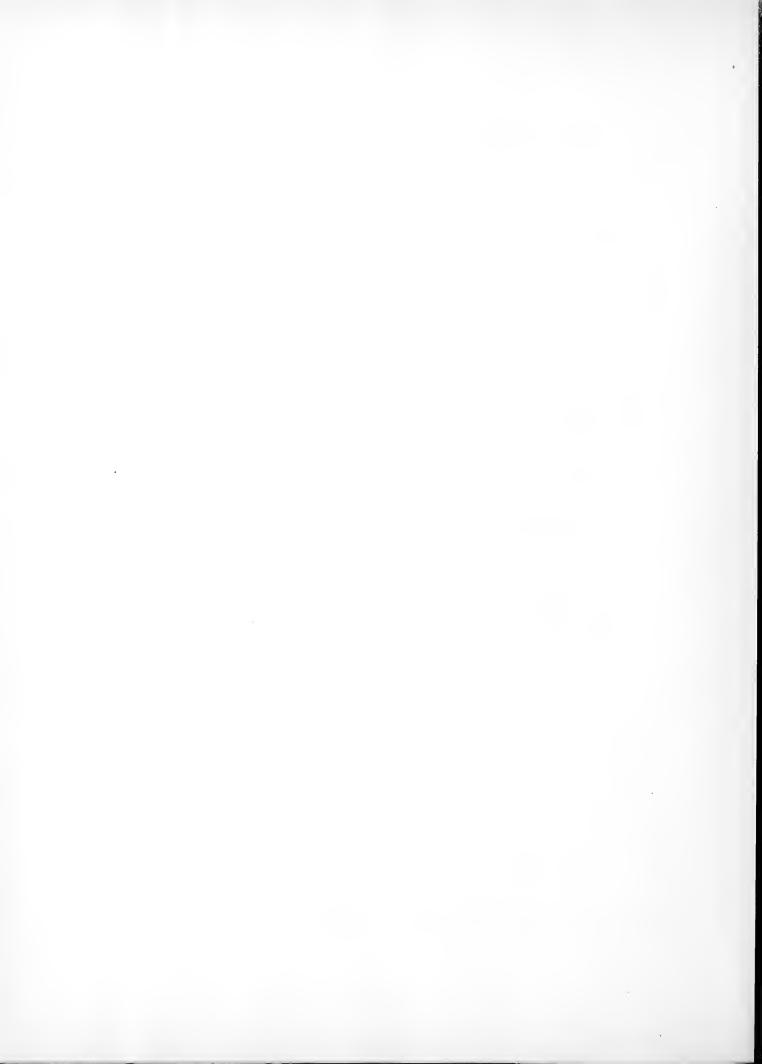

Teaching in the Model School
Grammar
Acading
Thotoric
Literary Cirticism

*History and Methods of Educ.

English Literature
Hamlet and themes
Arithmetic
Albebra
Geometry
Thysics
Lrawing
Geography
Thysical Geography
U.S. -istory
Ancient Listory
Chemistry
Anatomy and Massiology
Toology

In this course we notice that provision has been made for the normal school student. The courses marked "were designed to furnish the student not only the underlying principles of educational theory but the practical as well. The other courses were presented in order that the atudent might have a real educational foundation for his profession.

^{1.} Catalog, Ill. State ormal, 1876-7.

In the catalog of 1895, we find the following courses of study as presented to the normal students (1).-

Reading
Arithmetic
Algebra
Geometry
Bookkeeping
School Law
Geography
Thysical Geography
U. S. Listory
Givil Government
Ancient Eistory
Hediseval Distory
Drawing
Penmanship

Thysical Training
Vocal Susic
Training
Energia
Enterid
Titerature
Shakespeare
Toology
Physiology
Botany
Physics
Chemistry
Whements of ledagogy
Sychology
Thilosophy of Education

In addition to these subjects there was also a department of Ancient Languages, a department of German, and a department of Tolitical Economy. Opportunity for training work in the grades was also given the student (2).

above it appears that more attention was given to the material to be taught in the schools than to the method of teaching.

However, considerable training in methods could be obtained from observation work. Although there is no indication that training in methods was given, we do know that the Model School was in existence from the founding of the school.

^{1.} Catalog, Ill. State Tormal, 1895, pp. 14-43.

The three curriculums given below are taken from the catalog of the Illinois Itate Formal for the year 1901 (1).

Two-Year Trogram

Mote: The primary purpose of the various courses given above is indicated in each heading. Many other vocational courses are offered but since they are not purely normal school programs they are omitted from this paper.

The Southern Illinois Normal School

In the Biennial Report of the Superintendent of Sublic Instruction for 1873-4, we find that there were two courses of study provided for .- a Preparatory and a Normal Course, the latter being divided into Classical and Scientific courses. The Freparatory course extended over a period of three years. while the Normal course was four years in length. The courses as adopted at that time are as follows: (1).

Preparatory Rirst Year

- 1st term. Arithmetic. written and mental; Geography, Reading Spelling, and Writing.
- and term, -Same studies continued.
- 3rd term, -Same studies continued; Grammar, Hatural History. Second Year
- 1st term, -Arithmetic, Grammar, Teading.
- 2nd term, -Reading, Grammar, U.C. Wistory.
- 3rd term, -Grammar, Botany, Elem, Astronomy, Reading.
 Third Year
- 1st term, -Latin, Physiology, Review Arithmetic, Algebra. 2nd term, -Latin, Natural Philosophy, English Analysis.
- 3rd term, Teometry, Latin, Greek, English.

Hormal Course, Classical and Scientific

- First Year
 1st term, -Univ. Algebra, Quadratics, Latin, Greek, Eng. Language.
 2nd term, -Univ. Algebra, Latin, Greek, Eist. of Eng. Language
- 3rd term, -Geometry, Latin, Greek, English.

- Second Year
 1st term, -Geom.completed, Latin, Greek, English.
- 2nd term, -Trig. and Surveying, Latin, Greek, Thysiology.
- 3rd term, -Botany, Latin, Greek, Matural Philosophy.

Third Year

- 1st term, -Thetoric, Inc. List., Greek, Zoology.
- 2nd term, -Logic, Mod. Hist., Greek, Chemistry. 3rd term, -Eng. Lit., Vistory, Conic Sections, Geology.

Fourth Year

- 1st term, -Mentel Phil., ang. Lit. & Crit., Thys. Geog., Letin, Pedges.
- 2nd term, -Ethics, Astronomy, Greek, Fedagogy, Bookkeeping.
- 3rd term. -Const. of US., School Laws of Ill., Fedgaggy, Bookk'g.

^{1.} Report of Supt. of Fub. Inst., 1873-4, pp. 184-5.

that the Preparatory subjects do not include any strictly normal school courses. According to the report noted above, it was provided for those who were old enough to enter the university but were not sufficiently advanced to enter the normal course. Is soon as the student was considered capable of pursuing the more advanced course advantageously he was promoter to that department.

The purpose of the normal course was to provide a more extended knowledge of subjects beyond those of the preparatory course. It will be also noted that not much attention was given to the theory of education. Heither is there any indication that the pupil was given the privilege of practice teaching. In 1901 the course of study was as follows (1):

Sub-Normal course, -For those below standard requirements, 18 subjects of ordinary grade work for one year.

lrofessional course, -For prospective teachers, la professional subjects for one year.

Inglish course,-Four years,
47 subjects with 19 electives.

Latin course, -Four years, 48 subjects with 19 electives.

migh School course, - Four years, 48 subjects.

^{1.} Catalog, Sou. Ill. Normal, 1901, pp. 21-6.

In the 1901 course of study there was provision for strictly professional work, involving fifteen subjects which were especially adapted to the prospective teacher's needs. In addition to this course there were three courses which might be pursued with profit, namely, the English, the Latin, and the Figh School. Each of these required four years for completion and fitted the student to take charge of those subjects either as a special or as a regular teacher. Lowever, he was advised to complete the professional course before taking a position in the schools.

There was a wider choice of courses allowed the student as is indicated in the 1915 course of Study (1). The subjects given in each course are those thich might ordinarily be expected to be presented. The names of the courses are as follows:

For Lighth Grade Graduates

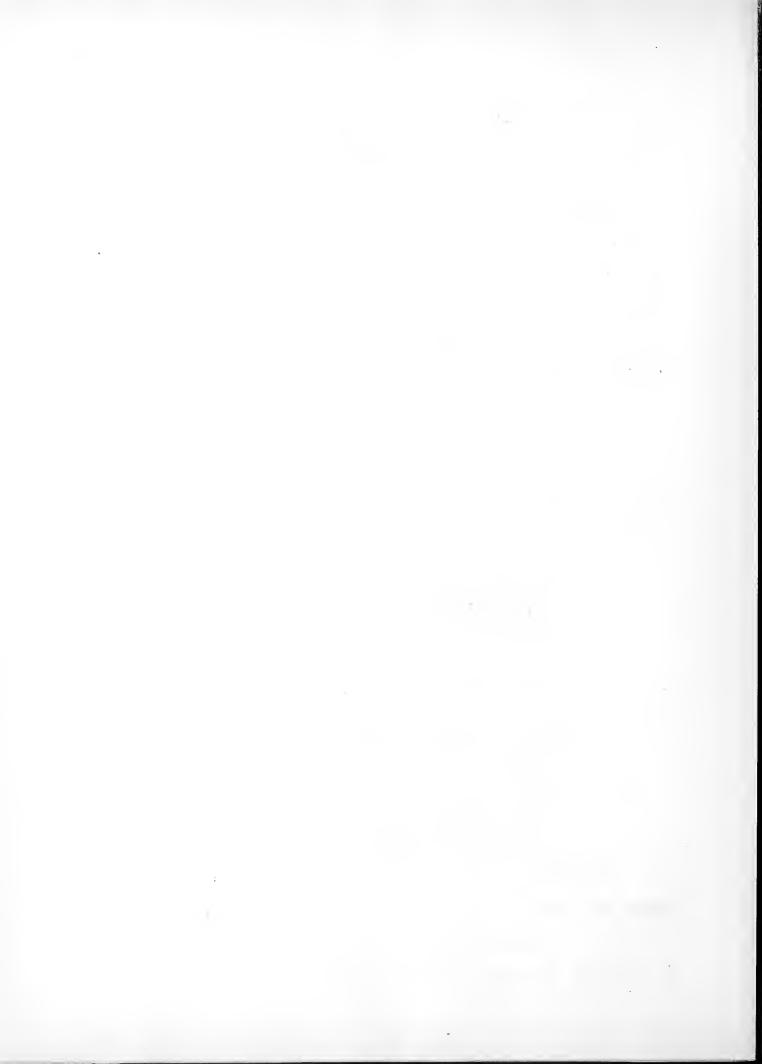

Lenguage, six years
Art course, six years
Household Arts, six years
Manual Arts, six years
Agriculture, six years
Commerce, six years
General, six years

For High School Ireductes

General, two years
Art, two years
Manual Arts, two years
Household Arts, two years
Agriculture, two years
Commerce, two years

For the satisfactory completion of any one of the courses named the student was granted the Worsel Liploma.

^{1.} latalog, op. cit., 1918, pp.18-27.

The Morthern Illinois Normal School

The Course of Study as published in 1901 may be stated briefly as follows(1):

Course I,- For college and normal-school graduates. This required at least twelve credits; including two of teaching.

It was essentially a one-year course.

Course II. - For graduates of high schools on the accredited list of the University of Illinois. Half-day teaching the last year was required in addition to School Management which was given each term. Two years were required to complete the course.

course III,- This course was intended for those who lacked technical preparation for Course II. It required more extended study in secondary subjects than the former course. The same professional courses were offered. It required three years.

Course IV,- An extended course. The study of Latin,
German and Greek were stressed. School Management and Practice
teaching were required throughout the last year.

These courses were later augmented by the addition of the following(2):

Two-year course for teaching Home Economics. This course is planned to prepare teachers of cooking and sewing for the grades. Half-day teaching in the Training School is required. Students must be graduates of accredited high schools.

^{1.} Annual Catalog, Nor. Ill. Normal, 1901-2, pp. 15-17.

^{2.} Ibid., August, 1919, pp. 19-22.

Two-year course in Industrial Arts. To prepare teachers of manual training for elementary schools and for woodwork, printing and mechanical drawing in secondary schools, Graduetion from an accredited high school is required for admission to the course.

Two-year course for Special Teachers in Tablic Achools.

Two-year course in Music. This is intended for the proparation of teachers and supervisors of music in public schools.

Special Three-jest course in Drawing and Music.

Epecial Three-jest course in Home Economics and Music.

Note:

For lack of space a detailed list of subjects in the various courses is not given herewith. It is assumed that the various courses offer subjects peculiarly adapted to that course or department. Or further information on this subject the reader is referred to the bulletins of the school cited.

The Rastern Illinois State Normal School

The Course of Study as adopted by the school indicated above, consisted of the following: (1).

One-year course for Graduates of reputable colleges. It consisted of:

General Psychology
The Development of the Child
The Tsychologic Foundation of Educational Method
Theory of School Management
American History
Sociology
Ecology
Physiology
Commercial Geography

In addition to these courses there was required work in the Training Department. This consisted of Fractice Teaching. Subjects could also be elected from other courses.

Two-year course for craduates of accredited high schools. Half-day teaching was required the last year. The student was permitted the choice of subjects from electives the last year.

Three-year course for graduates of high schools with short courses, and for undergraduates of high schools. This course was arranged for those who came from high schools with approximately twelve units, or a three year course.

tificates, and for pupils who have completed a grammar school course and are of sufficient matuirity and attainments to do the work required. Teaching and observation was required of all students in the courses mentioned above.

^{1.} seport of Supt. of Jub. Inst., 1900-02, pp. 85-7.

The following curriculums are offered by the Eastern Illinois Normal, beginning September, 1920 (1).

- I. The Two-year curriculum (24 credits) for preparation of teachers for the grades.
- II. Four-year curriculums (48 credits each) for preparation of the following:
 - 1. Primary Teachers.
 - 2. Intermediate Teachers.
 - 3. Grammar Grade Teachers, High School Teachers, and Teachers of Special Subjects:
 - A. Agriculture G. Home Economics
 B. Art and Dosign H. Manuel Arts
 C. English I. Mathemetics
 - D. Foreign Language
 E. Geography
 F. History
 J. Music
 K. Science (Biological)
 L. Science (Physical)
 - 4. Supervisors and Principals.

In the four-year curriculums the student in every term of every year has one course in education including psychology and practice teaching. In every term of every year he has the choice of one major elective. Two years of English are required in addition to one year's work in laboratory science, and one in social science, hygiene, and public senitation. It is also interesting to know that physical education, the use of the library, and penmanship are required in all curriculums, but are not a part of the total number of credits.

^{1.} The Normal School Bulletin, April, 1920, pp. 33-4.

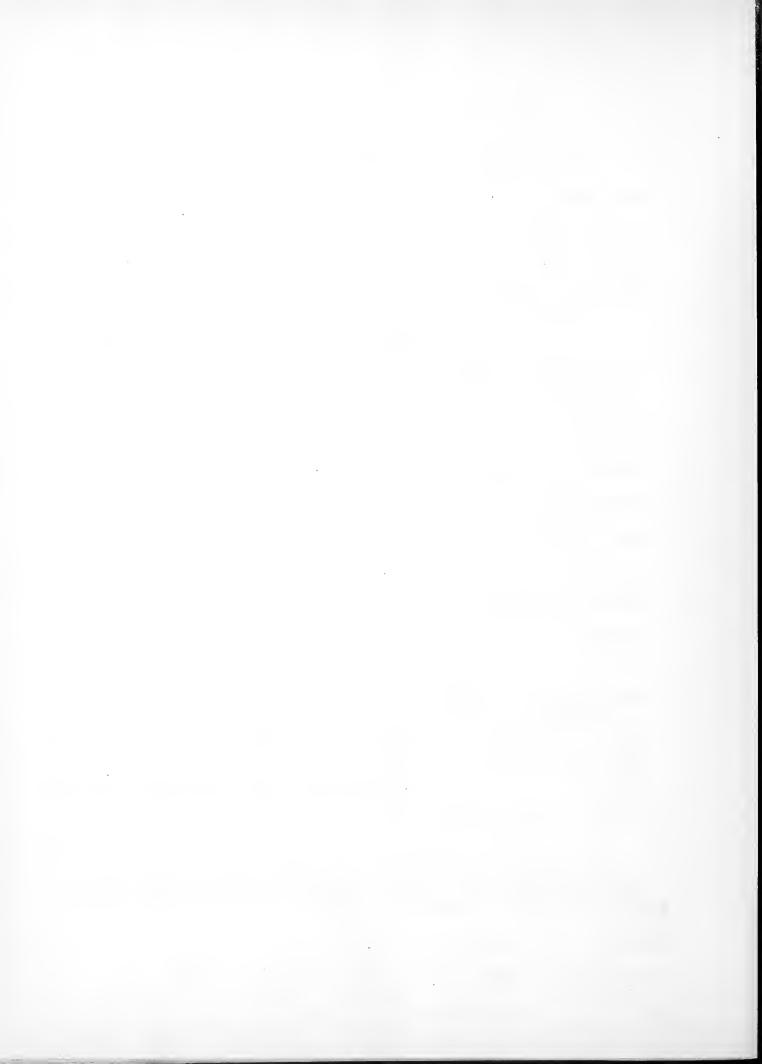

The Western Illinois Normal School

This school began with three courses of study, or rather, three programs, the two-year program, the three-year program, and the four-year program. The three and four-year programs have the same general subjects but are treated more extensively than in the two-year program. They are stated as follows: (1).

	no-year Credits	Three-year Oredits	Four-year Oredits
Psychology and Tedagog	у З	3	3
Observation and Teaching	Lg 2	2	2
English	1	2	3
Geog. and Geology	1	2	2
History and Civics	1	2	3
Mathematics	1	2	4
Biology	1	1	2
Physical Science	1	1	2
Drawing	1	1	1
Music	1	1	1
Expression and Physical	1 1	1	1
Culture Manual Training	1	2	
Total prescribed Blective	15 1	19 5	25 7
Potal required credits	16	24	32

Note; - A credit is given for the completion of a course in any study covering a term of eighteen weeksnand five recitations of forty minutes each, weekly.

^{1.} Report of Supt. of Fub. Inst., 190304, p. 104.

In June, 1920, the following diversified curriculums were offered in the Testern Illinois Normal School (1).

Normal School Curriculums

One-year curriculums, twelve dredits required.

For students who are graduates of an approved college.

A. For elementary teachers, supervisors and superintendents.

B. For high school teachers and principals.

Pwo-year curriculums, twenty four credits required.
For students who are graduates of an approved four-year high school.

A. For teachers in all grades.

B. For teachers in upper grades.

C. For teachers in lower grades.

Five-year curriculums, seventy two credits required.
For teachers who have taught one year or more but who
are not graduates of an approved four-year high school.

Six-year curriculum, seventy two credits required.

For eighth grade graduates who do not wish to take a foreign language.

For eighth grade graduates who wish to take a foreign language.

Special Curriculums

Agriculture
Chemistry-Physics
Commerce
Drawing and Design
Drawing and Music
English
Geography
History

History-English
Household Arts
Manual Training
Mathematics and Physics
Physical Education
Primary
Public School Music
Science

Thirty credits are required in each of the above courses covering a period of two years, sixteen credits in the Junior year and fourteen credits in the Senior year.

Library Economy

One year's work in addition to the regular Two-year Normal School curriculum is required. It may be taken in connection with the regular two-year course, or it may be taken

^{1.} Normal School Quarterly, June, 1920, pp. 35-64.

following graduation from that curriculum. The special certificte in Library Economy is based apon thirty-five hours a week for one school year of practical work in the Library.

Four Year College Jurriculums

These curriculums are open only to graduates of an approved four year high school. sch is composed of forty-eight term courses and leads to the college degree, Buchelor of cience in Iducation. They are as follows:

For Elementary Teachers.

For Superintendents and Mementary Principals and Supervisors.

For Righ Cchool leachers and Frincipals and Special Teachers.

For Smith-Hughes Teachers of Agriculture. For Smith-Hughes Teachers of Home Repromies.

Academic Curriculum

This course is designed for teachers of one or more years of experience, and for eighth grade graduates. Forty eight 60-hour credits are required for the Academic Liploma.

The requirements for the Cormal Diploma are as follo s (1).

Prithmetic, -Ratter and sethod in the Grades, one credit. Tducation, - Frinciples of Resching)
School Administration) one credit each.

Observation and Practice Teaching, three credits.

English, -Matter and Wethod in Language

and Grammar in the Grades, one credit. Story Telling, Transtization and Tesding, one credit.

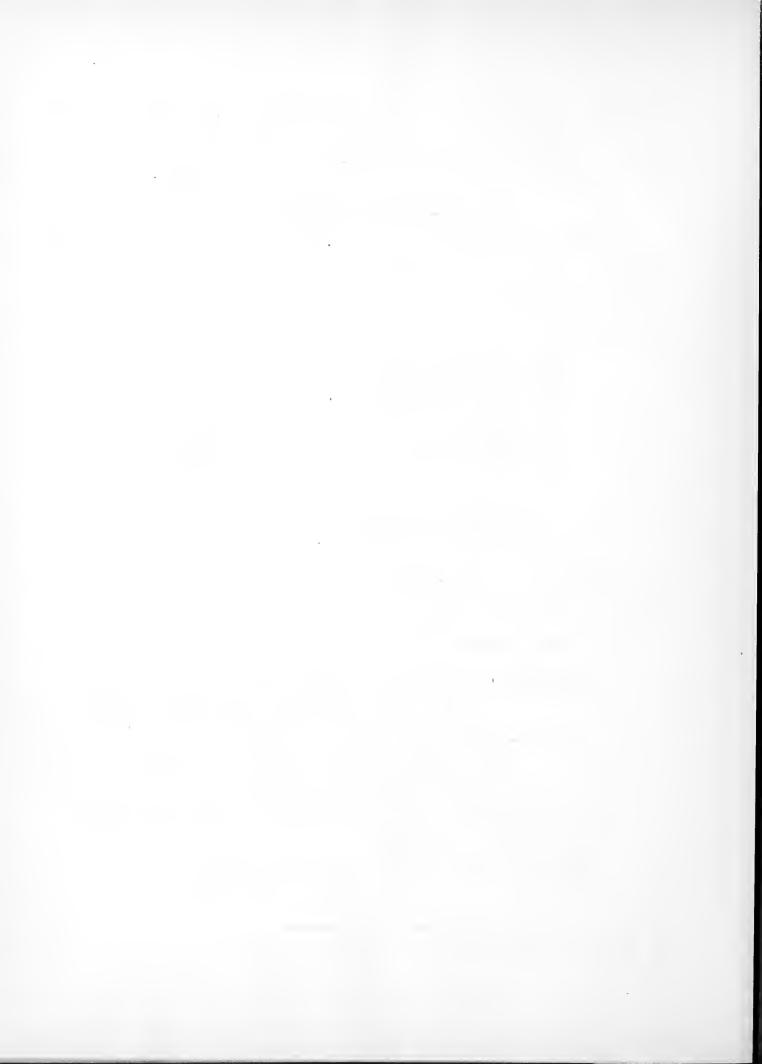

Tublic Recking, one credit.

Jeography, - Matter and Method in the Grades, one credit. Bistory, - Mathemand Method in the Grades, one credit.

Tsychology, - one credit. Sociology, - one credit.

Thysical Foucation (For man), one credit. (For women), one credit.

^{1.} Nor. 3ch. Quarterly, June, 1920, pp. 32-3.

The Echool Arts (For women)
Lrawing and Lesign, one credit.
Music. one credit.

(For men) Any two of the following: Drawing and Design, one credit.
Library Economy, one credit.
Munual Training, one credit.
Music, one credit.

Electives, General, eight credits.

Then we consider the course of study as outlined for the year 1903 in connection with that of 1920, we are atruck by the great change in subject matter. The latter program shows a more diversified curriculum. It sims to fit the student whether he desires to enter into business or into the work of teaching in the public schools. The large amount of Observation and Practice Teaching is a marked advance from the curriculum offered by the school in its earlier history.

Chapter VII.

The Summer School.

1874 when the Southern Illinois Formal University opened its doors to students on July 2(1). Tubsequent to this date for a period of about twenty-sin years, trirteen summer sessions were held, averaging one every two years. It the end of that period, namely, 1900, President Jarkinson recommended a permanent summer school of six weeks. As a result the summer session has been an integral part of the regular school year since that time. The Illinois "tate Mormal was next to adopt a regular summer session. This occurred in 1899, the first term of which was hold in 1900 (2).

The Morthern Illinois Mornal has hold a summer session since the establishment of the school (3). It was made six weeks in length for each of the terms. A student, however, is permitted to enroll in the school for either or both of the terms. The first currer session of the Mastern Illinois Mormal was held during the year 1901 (4). The contern Illinois Mormal, being the newest State normal in Illinois, was the last to open its doors for the accommodation of summer school students. This occurred in the summer of 1903 (5).

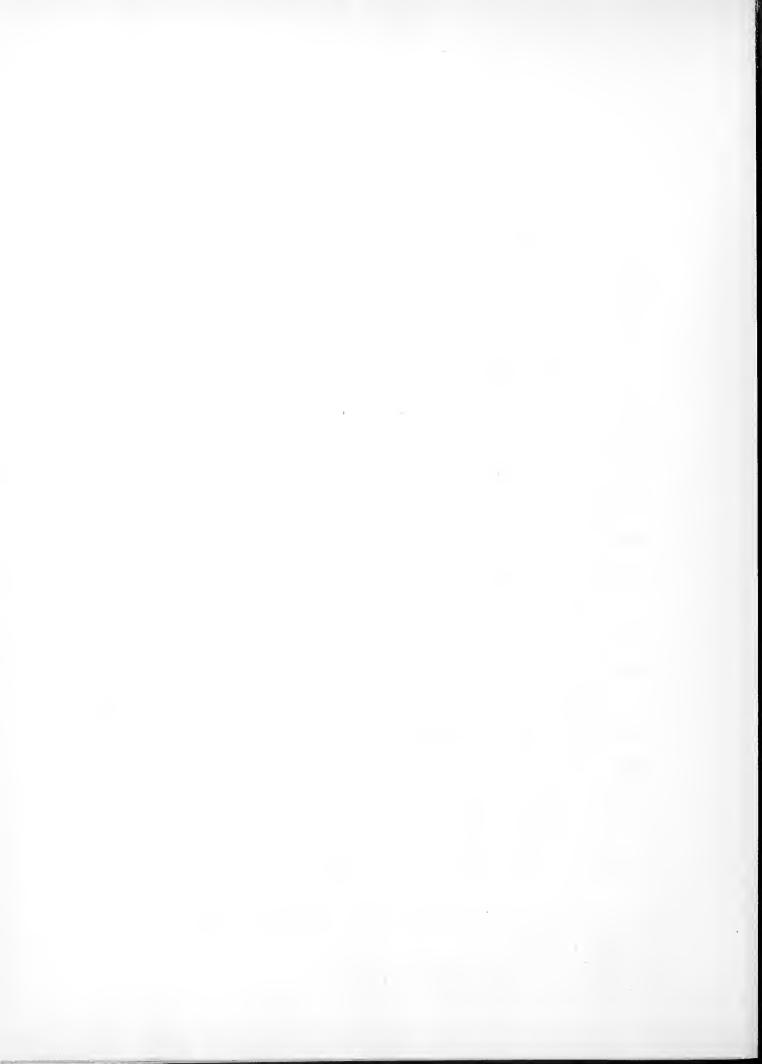

^{1.} Report of Supt. of Tub. Inst., 1898-00, p. 95.

^{2.} Ibid., p. 83.

^{3.} Educ. Hist. of Ill., The, - p. 250.

^{4.} Report, op. cit., 1900-02, p. 88.

^{5.} Ibid., 1903-4, p. 109.

The cause for the establishment of the summer schools was not the result of an accident. It was the result of an incessent demand on the part of the teachers to have an opportunity during the vacation period to extend their knowledge of educational theory and to acquire new ideas in school management and procedure.

part of the summer in extended study, the sessions in all the schools under consideration have adopted the six-weeks term. Thus the student may, if he desires, complete a college or normal school course by attendance on summer sessions. Furthermore, the large numbers of students attending such summer sessions in the liste normals is sufficient indication that the teachers and students are slive to the educational needs of the public school teacher.

Chapter VIII.

Conditions of Admission

In the circular sent to the County School Commissioners announcing the opening of the Illinois State Normal University, the Frincipal directed their attention to the provisions of the law in respect to admission to the university and fixed qualifications for candidates as follows (1):-

- 1. "To be, if males, not less than 17, and if females, not less than 16 years of age.
- 2. "To produce a certificate of good moral character, signed by some responsible person.
- 3. "To sign a declaration of their intention to devote themselves to school teaching in this State.
- 4. "To pass a satisfactory examination before the proper officers (County School Superintendent) in reading, spelling, writing, arithmetic, geography and the elements of English grammar.
- 5. "To agree to remain in the school, consecutively, at least one year.

In addition to these qualifications all students were required to take the following please: (2).

"I hereby declare my intention to become a teacher in the schools of this State; and agree that for three years after leaving the university, I will report in writing, to the principal thereof, in June and December of each year, where I have been, and in what engaged."

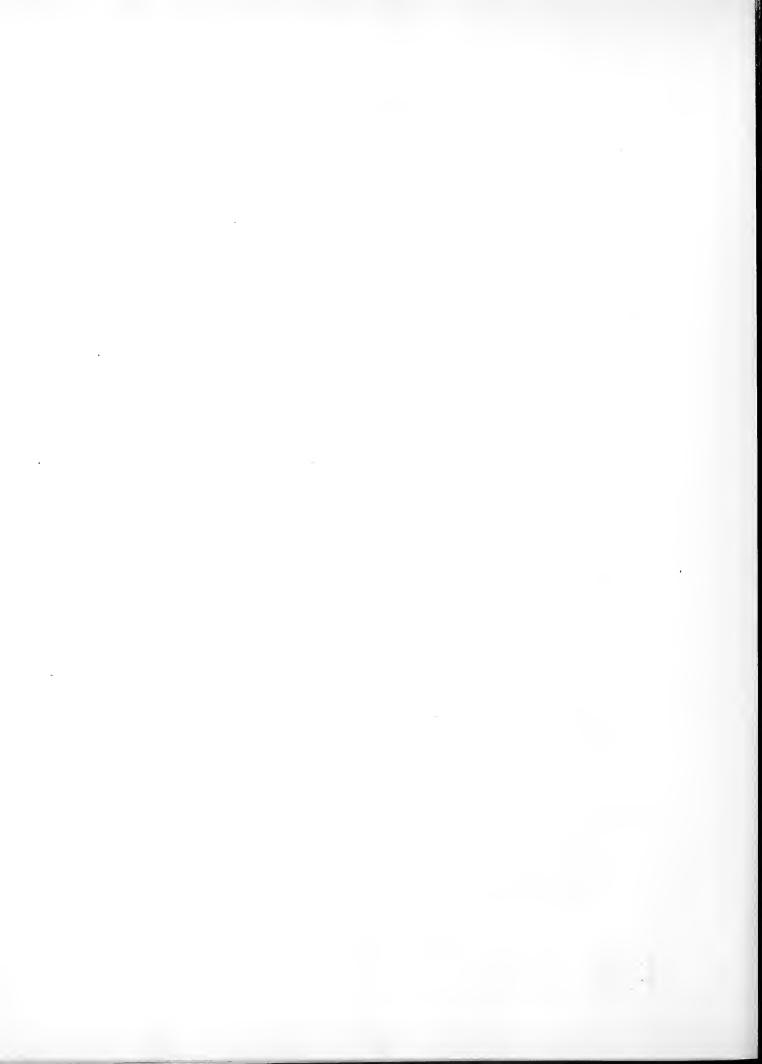

President Hewett in his report for 1887-8 gives the following as conditions of admission: (3).

"Applicants for admission to the Normal Department are admitted at once, if they bring appointments from the county officers, a diploma from a reputable high school, a first grade certificate, or if they have been duly

^{1.} Report of Supt. of Fub. Inst., 1859-60, p. 127.

^{2.} Ibid., p. "CVIII.

^{3.} Ibid., 1887-8, p. LX.

promoted from the Model Department. Otherwise they are examined for samission in reading, spelling, srithmetic, geography, grammar, and United States history. Fone are admitted on this examination whose peneral average is below 60 per cent. It should be said, in this connection, that the Board of Education have made a general average of 85 per cent the minimum for applicants coming from McLean county. Itudents from that county whose average is above 60 but below 85, are allowed to join the school by paying tuition at the rate of thirty dollars per year."

In 1891, the require-

ments permitted students of other State normal schools to enter and receive credit for work done (1). These conditions remained practically unchanged until 1905, when the Lindley Act provided for a township scholarship. This act provides for an annual examination in each township adapted to graduates of the eighth grade. The candidate making the highest average in his township is awarded by the State Superintendent of Jublic Instruction a scholarship good for four years at any state normal school in Illinois (2).

The conditions of admission for the nouthern Illinois

Mormal School were the same as those of the former school

at that time, with this exception: "That they should sign a

declaration to teach in the public schools and to give Took

County the preference in all offers to secure their services

as teachers. Furthermore, pupils were admitted to the Prop
aratory department without examination, by signing a declaration
that it was their intention to enter the normal as soon as

qualified (3).

^{1.} Report of Supt. of Pub. Inst., 1891-2, p. LVI.

Illinois Session Lews, 1905, p. 379.
 heport, op. cit., 1873-4, p. 190.

The admission requirements indicated above remained in force until after the establishment of the Morthern and of the Eastern Normal School. Of course, the conditions varied somewhat but in substance they were as follows:

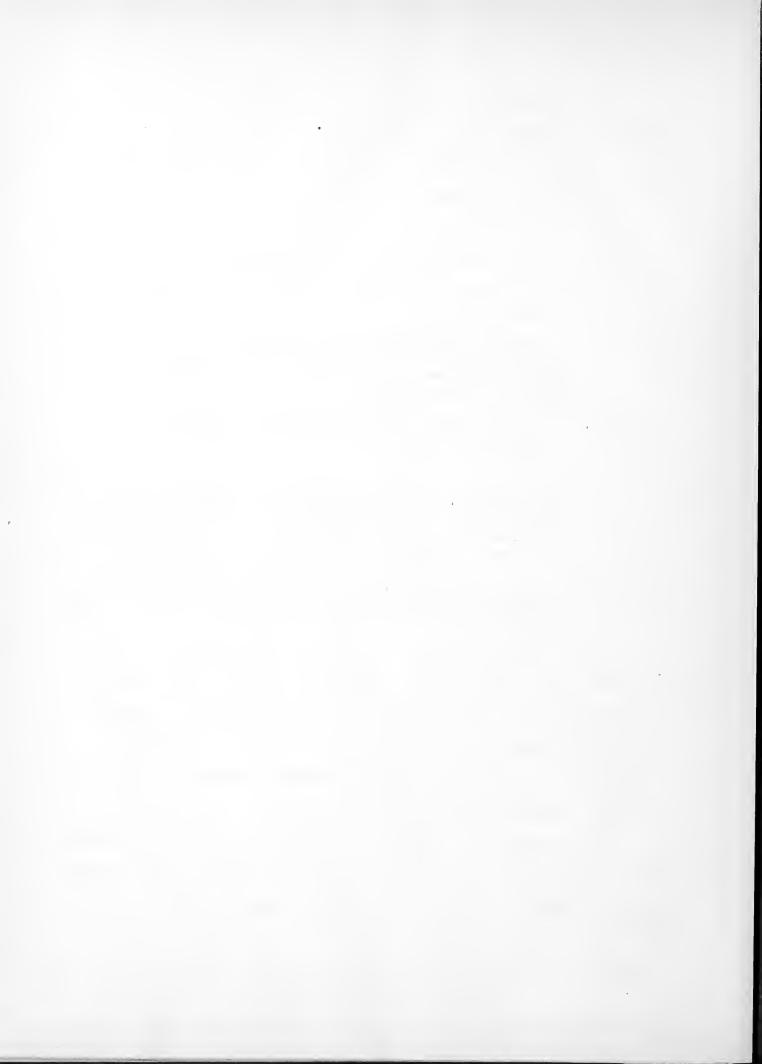

- 1. & diploma from en accredited high school.
- 2. A first-grade teacher's certificate.
- 3. A certificate of athendance at another state normal school.
- 4. A township scholarship under the Lindley Act.
- 5. A county diploma or certificate of graduation from the eighth grade.
- 6. A statement from projer school authorities showing that one or more years of high-school work has been completed.
- 7. To obtain free tuition, students who were not holders of township scholarships were required to sign a declaration of their intention to devote themselves to teaching in the public schools of Illinois for an long a period an they attended the normal school.
- 3. Teachers of maturity and experience were admitted as special students and were permitted to take up any work for which they were prepared.

These conditions were essentially unmodified by the

Testern Normal when it was organized in 1900. There were,
of course, slight differences in the requirements of each of
the five normals insamuch as each school had a different
section of the State involving different conditions. In order
to make these entrance requirements uniform the Fresidents'
Council of the Normal School Board established under the terms
of the Civil Administrative tode adopted the Tollowing uniform
entrance requirements:— A. ith Righ School Gredits; B. With
a Teacher's Certificate; and C. With credits from recognized
higher institutions. Graduation requirements were also made uniform.

Conclusion

The five State Normal Schools of Illinois created by separate acts of the Regislature and Located in different sections of the State have had their individual characteristics further developed by the presidents and faculties chosen to project their courses of study and to give the instruction. President H. W. Everest of the Southern Bormal School stated in the Twenty-first Bienniel deport (1) that a special governing board for each institution insured thorough supervision, and promoted a wholesome rivalry between the Itate schools, but slso that the plan had two obvious objections - want of unity in State control and subjection to political parties. Frequent changes in trustees, faculty, and aims of the school, are also very detrimental to the purpose of the institution. Thile each school should retain certain characteristics peculiar to its location and position, there should also be a certain uniformity which can only be brought about by conferences of the presidents and trustees in control of these schools. To bring this condition about, the first conference was called by the Superintendent of Public Instruction in Lecember, 1913 (2). As a result there was a more unified course of study and methods of imparting information to the students.

At this point the terms and influences of the Civil Administrative Code which become effective July 1, 1917 (3) should

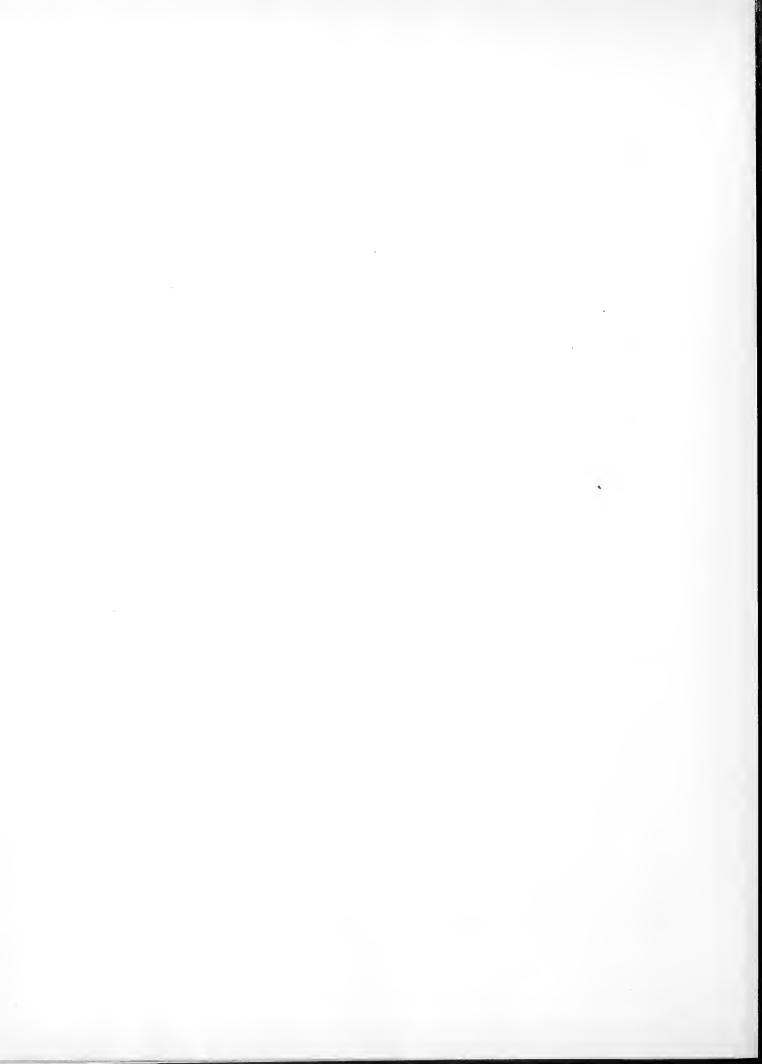

^{1.} Report of Supt. of Jub. Inst., 1904-6, p. 119.

Illinois Session Laws, 1917, pp. 4 and 9%.

be set forth. According to the terms of the act mentioned, the five Etate normal schools passed under the control and Edministration of a single board, consisting of two ex-officio members - the Superintendent of Sublic Instruction and the Director of the Department of Legistration and Education - and nine appointive members. Those favoring the change from five separate boards to one board believed that it vould effect certain economies in money, time and energy, and would result in a large and more effective activity on the cart of these normal schools in the preparation of teachers for the State. It is further believed that certain local influences which heretofore have looked upon the nurral schools is belonging, in a way, to the particular section of the State, or county, or town, in which it was located, stood in the way of the development of a large normal achout program for the entire State. Every member represents all of the five normal schools. end while the Normal School Doard has complete authority in the employment of teachers and all other employees connected with the normal school, the Lineator of Finance may exert a determining influence through his additing of the bills. The Lepartrent of Public Torks has authority and power in the construction of all buildings and the State Purchasing Agent must be consulted on all purchases of equipment and materials for the schools. As yet the new plan may not be all that is wished for but it is believed that the older the plan becomes, the rester harmony and concentration of authority and power will result and that all occasions for overlapping and conflicting of authority will be removed.

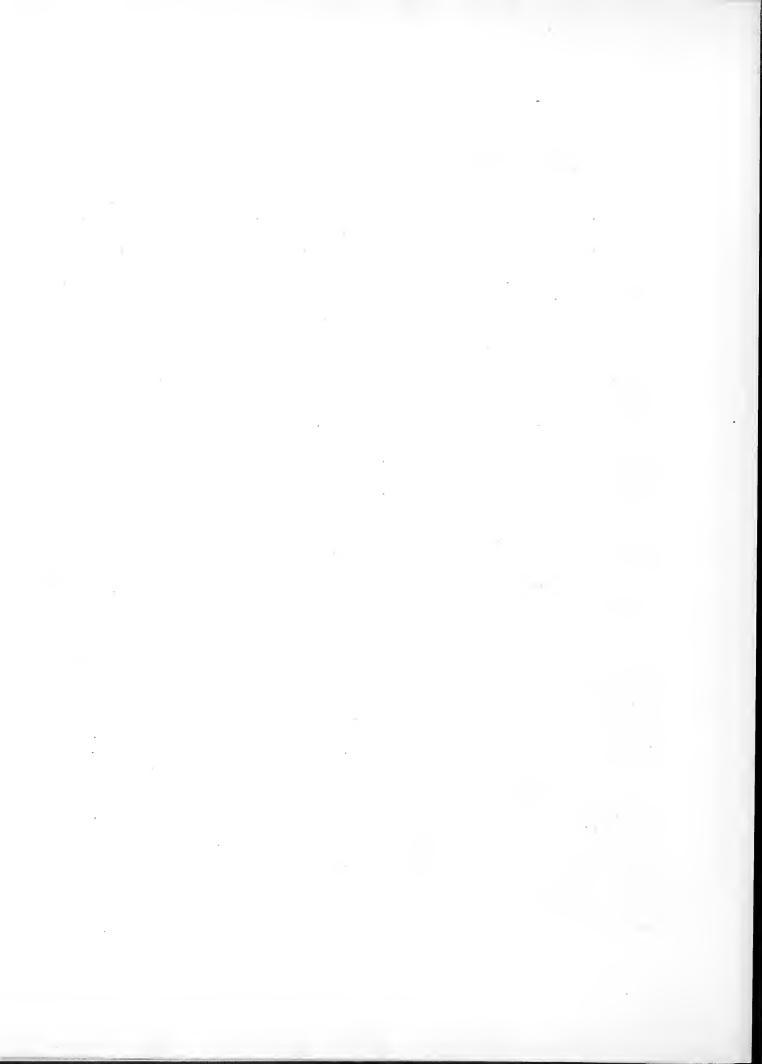

Appendix "A"

"Section 1. Be it enected by the cople of the State of Illinois, represented in the Teneral Assembly: That C.B. Denio, of Jp Deviess county, Simeon Wright, of Lee county, Deniel Wilkins, of McLean county, Pores, of learls county, George 2. Tex, of like county, Langel . Moulton, of thelay county, John Gillespie, of Jasper county, Bearge Dulson, of St. Blare county, losley clear, of loss county, Rillian of Sangemon county, John Eden, of Loultrie county, level humnom. of Thite county, one the aperl tendent of rublic lastruction, ex-officio, with their associates, who shall be clocted as herein provided, and their successors, ore hereby created a pody corporate and politic, to be styled The 30 rd of Fication of the State of Illinois, and by that make and so, le shall have perpotual succession, and have somer to contract that be contracted with, to sue and se sues, to plead and be impleaded, to acquire, hold and convey real and partonal property; to have and use e common seed, and to alter the same at pleasure; to make and establish by-laws, and elter or repeal the same as they shall deer necessary for the government of the normal university hereby authorized to be established, not in conflict with the constitution and laws of this State, or of the United States; and to have and exercise all powers, and be subjected so all duties usual and incident to trustees of corporations.

"lection 2. The Laperintendent of Public Instruction, by virtue of his office, shall be a member and secretary of said board, and shall report to the legislature at its regular sessions the condition and expenditures of said normal university, and communicate such further information as the said poard of education or the legislature may direct.

"Section 3. To member of the board of education shall receive any compensation for attendance on the meetings of the board except his necessary traveling expenses; which shall be paid in the case cannor as to instructors employed in the said normal university shall be paid. At all the stated and other meetings of the board called by the president or secretary, or any five members of the board, five members shall constitute a querum, provided all shall have been duly notified.

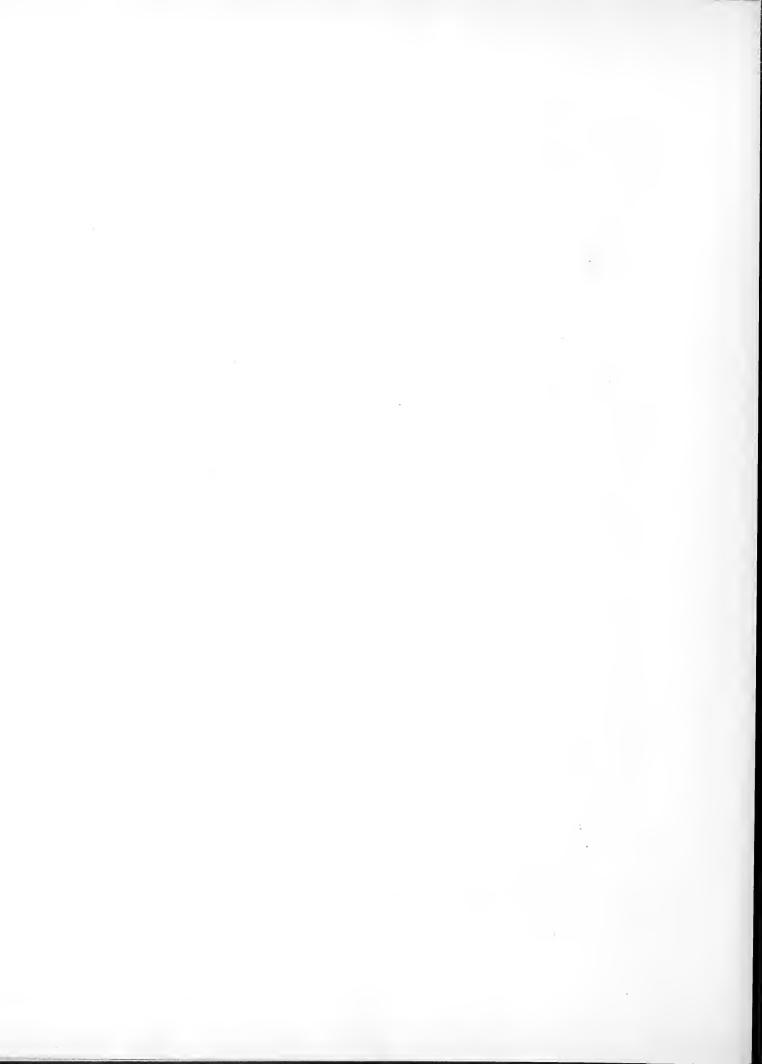

"Section 4. The objects of the said normal university shall be to qualify teachers for the common schools of the State, by imparting instruction in the art of teaching and all branches of study which part in to a common accoult education, in the elements of the natural sciences, including agricultural chemistry, animal and vegetable physiology, in the fundamental laws of the United States and of the state of Illinois, in regard to the rights and Juties of citizens, and such other studies as the board of education may from time to time prescribe.

"Section 5. The board of education shall hold its first meeting at the office of the Superintendent of Sublic Lastruction, on the first Tuesday of May next, at which meeting they shall appoint an agent, fixing his componention, who shall visit the cities, villages and other places in the State, which may be deemed eligible for the purpose, to receive donations and proposals for the obtablishment and maintenance of the normal university. The board shall have power and it shall be their duty, to fix the permanent location of said normal university at the clace where the most favorable inducements are offered for that purpose: Provided, that such location shall not be difficult of access, or detrimental to the welfare and prosperity of the said normal university.

"Section 6. The Board of Education shall appoint a principal, lecturer on scientific subjects, instructors and instructoreses, together with such officers as shall be required in the said Rormal University, fix their respective calaries and prescribe their reveral duties. They shall also have power to remove any of them for proper cause, after having given ten day's notice of any charge which may be duly presented and reasonable opportunity for defense. They shall also prescribe text books, apparatus and furniture to be used in the university, and provide the same; and shall make all regulations necessary for its management, and the Poard shall have the power to recognize auxiliary institutions when beemed practical; Provided, that such auxiliary institutions shall receive any appropriations from the treasury, or the seminary or university fund.

"Section 7. Each county within the State shall be entitled to gratuitous instruction for one subil in said Hornal University: and each respective district shall be entitled to gratuitous instruction for a number of pupils equal to the number of representatives in said district; to be chosen in the following manner: The school commissioner (county superintensent) in each county shall receive and register all names of applicants for admission in said Normal University, and shall present the same to the county court, or in counties acting under township organization, to the Board of Supervisors, which county court, wor Board of Supervisors, as the case may be, shall together with the county commissioner, examine all applicants so presented, in such manner as the Board of Aducation may direct, and the number of such as shall be found to mossess the requisite qualifications, such pupils shall be so selected by lot; and in representative districts composed of more than one county, the school commissioner and the county judge or school commissioner and chairman of the Board of Supervisors in counties ceting under township organization, as the case may be, of the several counties composing such representative district, shall reet at the clerk's office of the county court of the oldest county. and from the applicants so presented to the county court or Board of Supervisors, of the Governl counties represented, and

found to possess the requisite qualifications, shall select by lot the number of pupils to which the said district is entitled. The Toard of Education shall have the discretionary power, if any candidate does not sign and file with the Secretary of the Board a declaration that he or she will teach in the public schools within the State, in case that ongagements can be secured by reasonable efforts, to require such condidate to provide for the payment of such fees for tuition as the Board may prescribe.

"Section 8. The inter at of the university and cominary fund, or such thereof as may be found necessary, shall be, and is hereby appropriated for the raintenance of said "limal University, and shall be paid on the order of the Board of Education from the treasury of the Stare; but in no case shall any part of the interest of said fund be applied to the purchase of sites, or buildings for said university.

"Section 9. The board shell have jower to appropriate the \$1.000 received from the messrs. Merriam, of opringfield, messechusetts, by the late superintendent to the jurcrate of apparatus for the use of the Mormal university, when catablished, and hereafter, all gifts, grants and demises which may be made to the said Mormal University shall be applied in accordance with the sishes of the donor of the same.

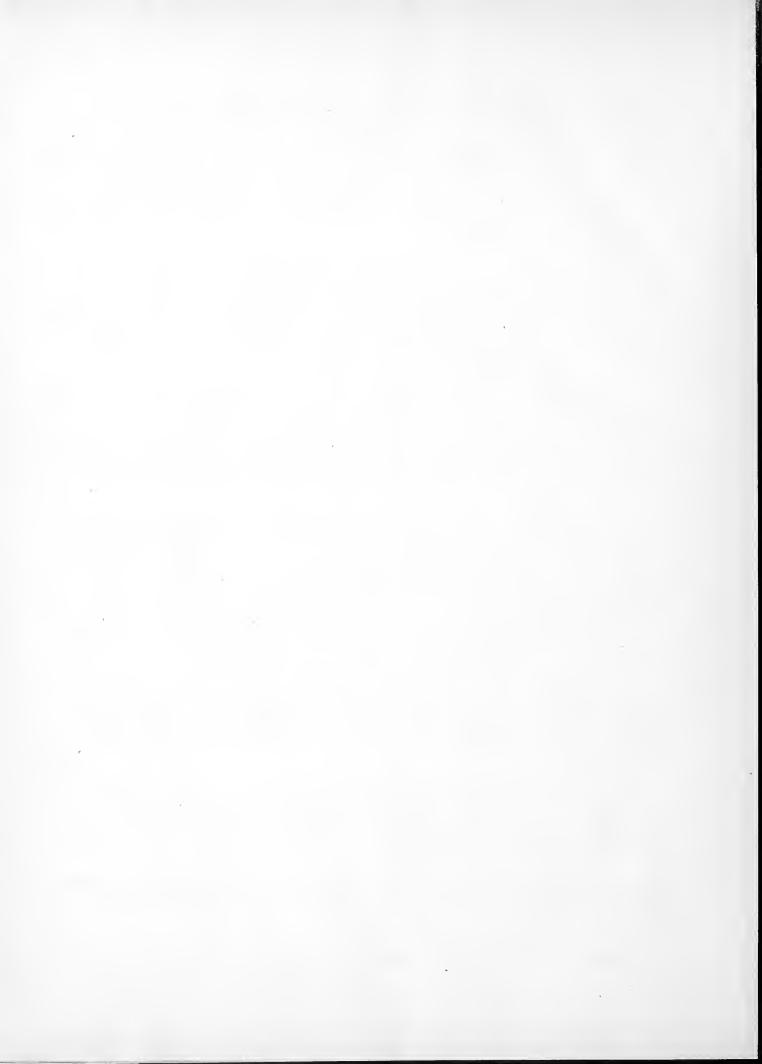

"Section 10. The board of corporators herein named, and their successors, shall each of them hold their office for the term of six jears; Provided, that at the first meeting of said Board, the said corporators shall determine by lot, so that one-third shall hold their office for two years, one-third for four years, and one-third for six years. The Covernor, by and with the advice and consent of the senate, shall fill all vacancies which shall at any time occur in said board, by appointment of suitable persons to fill the same.

"Dection 11. At the first secting of the board, and at each biennial meeting bereafter, it shall be the duty of said board to elect one of their number president, who shall serve until the next biennial meeting of the board, and until his successor is elected.

"Section 12. At each biennial meeting it shall be the duty of the board to appoint a treasurer, who shall not be a member of the board, and and small give bond, with such security as the board may direct, conditioned for the faithful discharge of via duties.

"Section 13. This set shall take effect on and after its passage, and be published and distributed as an appendix to the school law. (1).
